Encyclopedia of Western Atlantic Shipwrecks and Sunken Treasure Victoria Sandz, Robert F. Marx, 2006-10-25 From aerial survey to zoology. Part I of this two-part encyclopedia covers all aspects of underwater archeology, treasure hunting and salvaging. For example, entries are included for different types of artifacts, notable treasure hunters, the various salvaging equipment and techniques in mapping and excavating. Part II covers the shipwrecks themselves, dividing them into 13 geographical categories. Beginning with the northernmost category, Canada, and ending with the southernmost, South America, every known shipwreck, both identified and unidentified, receives an entry in alphabetical order under its appropriate geographical category. Entries are by name, such as Andrea Gail, Titanic, and Queen Ann's Revenge. Unidentified is used when a shipwreck's name remains unknown. Entries give the nationality, e.g., Spanish, British, American, type, schooner, frigate, brig, are three function examples, slave transportation, piracy, fishing, location, and history of the shipwreck.

Disaster Victim Identification in the 21st Century John A. Williams, Victor W. Weedn, 2022-04-04 A comprehensive examination of all critical aspects of Disaster Victim Identification (DVI). As the frequency of both natural and man-made mass fatality disasters increases worldwide, the establishment of clear standards and best practices within the field of Disaster Victim Identification (DVI) is of vital importance. Whereas most countries assign jurisdiction to law enforcement agencies following Interpol guidelines, DVI is the responsibility of the medical examiner and coroner in the United States. Disaster Victim Identification in the 21st Century is the first book of its kind to directly address the needs of DVI practitioners in the United States, covering the full spectrum of DVI from traditional methods such as fingerprints, odontology, and anthropology to advanced DNA identification technology. Approaching DVI from three perspectives: academic, government, and private industry, this comprehensive volume examines the history and current state of the discipline, the ongoing formation of national standards, the various methods of human identification, and the key challenges and future of DVI. In-depth chapters are written by leaders in the field with personal experience in human identification and mass fatality events. Provides practitioners with practical guidance on planning and taking part in DVI based on current national standards and best practices. Discusses continued improvement in both traditional and emerging DVI methods. Includes non-region-specific case studies and recommendations that can be easily adapted for international use.
