**Commonsense Guide to Current Affairs** Vincent Frank Bedogne, Marcy Jean Everest, 2009-08-01 From clones, family, abortion, terrorism and the concept of the collective to economics, nuclear power, cap and trade, renewable energy and the politics of climate change, Everest and Bedogne do something much needed and remarkably absent in today's media. They strip away the layers of liberal and conservative ideology to look at the most talked about topics of our time from the standpoint of what the politicians have forgotten: common sense. Brought to light by logic, history and science, the book filters the issues that in today's world every citizen, student and educator needs to understand through what we know to be sound, that which we have gained through our day to day trials, our all too often repressed ability to see things in a practical and matter of fact way.

**The Burning Answer** Keith Barnham, 2014-05-15 Our civilisation stands on the brink of catastrophe. Our thirst for energy has led to threats from global warming, nuclear disaster and conflict in oil rich countries. We are running out of options. Solar power, Keith Barnham argues, is the answer. In this eye opening book, he shows how a solar revolution is developing based on one of Einstein's lesser known discoveries, one that gave us laptop computers and mobile phones. An accessible guide to renewable technology and a hard hitting critique of the arguments of solar sceptics. The Burning Answer outlines a future in which the fuel for electric cars will be generated on our rooftops. It is above all an impassioned call to arms to join the solar revolution before it's too late.
