QUESTION 3

- 3.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 5 000 years old, near Mafeking is almost destroyed because of excessive extraction of water from the nearby Molapo river. The water is extracted for human consumption.

Peat lands like the one near Mafeking is exceptional and play an important role in storing water as well as preventing climate changes.

Dr Phil-Louis Grundling said that carbon that is 'held' or 'stored' by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The 'sponge effect' of the peat also makes it possible to store water that is then released during dry seasons.

Dr Grundling said that it might be too late to restore the peat land near Mafeking but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and frog species that lived in this peat land was also destroyed.

From: *Beeld*, 21 September 2018.

- 3.1.1 Give TWO other reasons (not mentioned in the passage) that can lead to the destruction of wetlands. (2)
- 3.1.2 Discuss reasons from the passage regarding the importance of these specific wetlands for the environment. (4)
- 3.1.3 Suggest a way in which this peat land near Mafeking can be restored. (2)

Life Sciences Exam Paper Term 2014:

Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come **ICT Innovations 2018.**

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives [Active Learning in College Science](#) Joel J.

Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman's challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured

as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of naive notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for

Deliberative Accountability in Parliamentary Committees Cheryl Schonhardt-Bailey, 2022-03-14 In recent decades we have seen an explosion in expectations for greater accountability of public policymaking But as accountability has increased trust in governments and politicians has fallen By focusing on the heart of public accountability the reason giving by policymakers for their policy decisions i e deliberative accountability this work offers an empirical route for understanding why more accountability may not always deliver more public trust The focus is on the British Parliament where both the Treasury Select Committee and the House of Lords Economic Affairs Committee hold hearings on monetary policy financial stability and fiscal policy The intent in these hearings is to challenge policymakers to explain their decisions and thus the dialogue is expected to be deliberative But how do we judge the quality of this deliberative accountability Three metrics are explored and measured respect non partisanship and reciprocity The approach is multi method including 1 quantitative text analysis to gauge the verbatim transcripts in committee hearings 2 qualitative coding combined with an experimental design to gauge the role of nonverbal communication in the hearings and 3 interviews with the MPs peers central bankers and Treasury officials who participated in the hearings The first method measures the content of what was said the second examines how the words and arguments were expressed and the third provides a more reflective why component by asking participants to explain their motivations This merging of the what the how and the why offers a novel template for studying both accountability and deliberation

Pharmocracy Kaushik Sunder Rajan, 2017-03-02 Continuing his pioneering theoretical explorations into the relationships among biosciences the market and political economy Kaushik Sunder Rajan introduces the concept of pharmocracy to explain the structure and operation of the global hegemony of the multinational pharmaceutical industry He reveals pharmocracy s logic in two case studies from contemporary India the controversial introduction of an HPV vaccine in 2010 and the Indian Patent Office s denial of a patent for an anticancer drug in 2006 and ensuing legal battles In each instance health was appropriated by capital and transformed from an embodied state of well being into an abstract category made subject to capital s interests These cases demonstrate the precarious situation in which pharmocracy places democracy as India s accommodation of global pharmaceutical regulatory frameworks

pits the interests of its citizens against those of international capital Sunder Rajan s insights into this dynamic make clear the high stakes of pharmocracy s intersection with health politics and democracy **Advanced Practice Palliative Nursing**
