One of the most technologically advanced yet easy to use blood pressure monitors available in the marketplace today.

The Advanced Inflation Sensor monitor automatically determines the ideal cuff inflation level and retains the last seven blood pressure and pulse readings in memory. The stored readings may be recalled by simply pressing the memory button. Whether the monitor is used to distinguish sustained hypertension from white-coat hypertension, improve patient compliance to treatment or as a preventive health management program, it can all be monitored using only one button.

The 16mm digital display makes this monitor easy-to-read and offers a unique simultaneous readout of systolic and diastolic pressure, and pulse.

This monitor is available in two cuff sizes: large and medium (small cuff is available separately). The UA-779 Advanced Inflation Sensor also includes a storage case. A large print instruction guide and quick start card are clearly written in English, French and Spanish. The LifeSource commitment to quality includes an industry-leading lifetime warranty on all products.
