Uncertainty, Rationality, and Agency Wiebe van der Hoek, 2006-08-18 This book collects all the papers that appeared in 2005 in *Knowledge Rationality and Action* KRA a journal published as a special section of *Synthese* which addresses contemporary issues in epistemic logic belief revision game and decision theory rational agency planning and theories of action As such the special section appeals to researchers from Computer Science Game Theory Artificial Intelligence Philosophy Knowledge Representation Logic and Agents addressing issues in artificial systems that have to gather information reason about it and then make a sensible decision about what to do next It will be clear already from the contents pages that this book indeed reflects the core of KRA the papers in this volume address degrees of belief or certainty and rational agency The latter has several manifestations often constraints on the agent's belief behaviour or decision making Moreover this book shows that KRA indeed represents a loop in the behaviour of the agent after having made a decision the life of the agent does not end rather it will do some sensing or collect otherwise the outcome of its decision to update its beliefs or knowledge accordingly and make up its mind about the next decision task

Professional Practice in Artificial Intelligence John Debenham, 2006-07-27 The Second Symposium on Professional Practice in AI 2006 is a conference within the IFIP World Computer Congress 2006 Santiago Chile The Symposium is organised by the IFIP Technical Committee on Artificial Intelligence Technical Committee 12 and its Working Group 12.5 Artificial Intelligence Applications The First Symposium in this series was one of the conferences in the IFIP World Computer Congress 2004 Toulouse France The conference featured invited talks by Rose Dieng John Atkinson John Debenham and Max Bramer The Symposium was a component of the IFIP AI 2006 conference organised by Professor Max Bramer I should like to thank the Symposium General Chair Professor Bramer for his considerable assistance in making the Symposium happen within a very tight deadline These proceedings are the result of a considerable amount of hard work Beginning with the preparation of the submitted papers the papers were each reviewed by at least two members of the international Program Committee The authors of accepted papers then revised their manuscripts to produce their final copy The hard work of the authors the referees and the Program Committee is gratefully acknowledged The IFIP AI 2006 conference and the Symposium are the latest in a series of conferences organised by IFIP Technical Committee 12 dedicated to the techniques of Artificial Intelligence and their real world applications Further information about TC12 can be found on our website <http://www.ifiptc12.org>

Non-Bayesian

Decision Theory Martin Peterson, 2008-06-06 For quite some time philosophers economists and statisticians have endorsed a view on rational choice known as Bayesianism The work on this book has grown out of a feeling that the Bayesian view has come to dominate the academic community to such an extent that an alternative non Bayesian position is rarely researched Needless to say I think this is a pity Non Bayesian positions deserve to be examined with much greater care and the present work is an attempt to defend what I believe to be a coherent and reasonably detailed non Bayesian account of decision theory The main thesis I defend can be summarised as follows Rational agents maximise subjective expected utility but contrary to what is claimed by Bayesians utility and subjective probability should not be defined in terms of preferences over uncertain prospects On the contrary rational decision makers need only consider preferences over certain outcomes It will be shown that utility and probability functions derived in a non Bayesian manner can be used for generating preferences over uncertain prospects that support the principle of maximising subjective expected utility To some extent this non Bayesian view gives an account of what modern decision theory could have been like had decision theorists not entered the Bayesian path discovered by Ramsey de Finetti Savage and others I will not discuss all previous non Bayesian positions presented in the literature

Multicriteria Decision Making Timothy Havranek, Doug MacNair, 2023-06-06 Public corporations and private businesses operate in an increasingly complex uncertain and interconnected world When evaluating investment decisions business managers can no longer base their decisions primarily on expected financial return They now must now consider a host of performance value measures i e criteria pertaining to issues such as environmental and social governance sustainability and stakeholder satisfaction In addition corporate managers must ensure that their investment decisions are aligned with the company's vision mission and values in order to maintain investor confidence and protect brand image Lastly to be truly successful business managers must assess the risks associated with each performance measure and manage their impacts during project implementation This book takes a pragmatic business and economics view

towards evaluating competing investment alternatives and or capital project strategies It provides a practical step by step process using a structured decision analysis framework to evaluate understand quantify and measure project investment strategies in light of multiple stakeholder objectives and success criteria This process assists in helping stakeholders internal and external achieve a shared understanding of project issues and to facilitate convergence towards a mutually acceptable solution The approach considers available choices identified uncertainties constraints necessary tradeoffs and preferences so as to identify solutions that maximize overall benefits while minimizing overall costs and risk A real world case study is presented in the early chapters and the process steps are demonstrated through application to this case study Recent advances in technology allow for investment strategies to be evaluated against multiple criteria within one integrated platform This book guides the reader in performing multi criteria decision analysis including the use of Monte Carlo simulation within an MS Excel environment using native MS Excel and as well as add in programs such Palisades Decision Tools suite Example model structures screen shots formulas and output results are provided throughout the book using an illustrative case study
