

D20 ENGINES

FROM MAN

► NEW ENGINE GENERATION D20 COMMON RAIL

Concept

The D20 common rail engine provides an ideal basis for day-to-day driving. The focus is on the favourable torque and power output over the entire range of speeds used when running the vehicle. The common rail injection technology offers the ideal technical basis in this respect.

The design of the system offers precise engine control, optimal fuel atomization and combustion, high injection pressures even at low rpm, providing considerable torque and power advantages. This Technology also provides the opportunity to utilise a quick responding Turbo charger in combination with a bypass function, providing quick drive away characteristics corresponding to engines with larger displacement.

MAN is able to offer a complete, future oriented common rail engine range, with a view to fulfilling future pollutant limits.
