

Chapter 2

Managerial Accounting and Cost Concepts

Solutions to Questions

2-1 The three major elements of product costs in a manufacturing company are direct materials, direct labor, and manufacturing overhead.

2-2

- a. Direct materials are an integral part of a finished product and their costs can be conveniently traced to it.
- b. Indirect materials are generally small items of material such as glue and nails. They may be an integral part of a finished product but their costs can be traced to the product only at great cost or inconvenience.
- c. Direct labor consists of labor costs that can be easily traced to particular products. Direct labor is also called "touch labor."
- d. Indirect labor consists of the labor costs of janitors, supervisors, materials handlers, and other factory workers that cannot be conveniently traced to particular products. These labor costs are incurred to support production, but the workers involved do not directly work on the product.
- e. Manufacturing overhead includes all manufacturing costs except direct materials and direct labor. Consequently, manufacturing overhead includes indirect materials and indirect labor as well as other manufacturing costs.

2-3 A product cost is any cost involved in purchasing or manufacturing goods. In the case of manufactured goods, these costs consist of direct materials, direct labor, and manufacturing overhead. A period cost is a cost that is taken directly to the income statement as an expense in the period in which it is incurred.

Ebook: Managerial Accounting - Global Edition

Ronald Hilton, David Platt, 2014-09-16 We are pleased to present this Global Edition which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing, while also including traditional topics such as job order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current, and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

Information Systems Development for Emerging Public Sector Cross-sector Collaborations Kayvan Yousefi Mojir, 2018-09-28 Information systems IS seem prevalent in modern societies and have resulted in the rapid digitalisation of different societal sectors One application domain of IS is emergency response which is responsible for delivering essential services to save lives and minimise environmental damage in both small frequent and large scale emergencies Specific IS applications are in turn used in emergency response to support such aspects as decision making communication information sharing and the dispatching of resources Public sector cut backs and a lack of professional resources have affected emergency response at the same time as natural disasters e g forest fires tsunamis storms terror attacks and wars in the Middle East leading to mass migration have intensified in recent decades At the same time frequent small scale accidents continue to occur on a regular basis both in urban and sparsely populated areas As a result emergency response actors first responders are often placed under severe pressure An emerging trend in response to these challenges both in Sweden and internationally is to create cross sector forms of collaboration by combining alternative resources from various sectors Such collaborations are relatively new and involve heterogeneous stakeholders Therefore the thesis objective is to explore IS related opportunities challenges and needs aimed at supporting heterogeneous actors in emerging cross sector collaborations in emergency response in order to enable and facilitate future related IS development To achieve this a user centred approach was applied A baseline study was performed followed by three case studies on co location of actors co operative use of resources and semi professionals as first responders by performing interviews focus groups participant observation Future Workshops an exercise and an after action review The thesis is based on case study research and

qualitative research methods Sociotechnical systems theory the sociotechnical ensemble view and network governance were used as the analytical framework As part of achieving the thesis objectives experiences from applying user participation in the context of cross sector collaboration are also presented as part of the results A context specific framework developed to systematise and explore various important aspects of cross sector collaboration in emergency response is also described The results of this thesis indicate that the needs for IS in cross sector collaborations vary from simple smartphone applications to manage alarms positioning and the dispatching of new resources to more sophisticated tools for sharing and viewing incident data The results also indicate that these collaborations have the potential e g resource redundancy pooled competencies to increase total capacity to improve Swedish emergency response if supported by adequate IS IT support The major challenges are organisational economic and juridical and the most prominent are ambiguities in actors tasks and responsibilities and how to prioritise between ordinary work and new first response tasks They must be addressed to enable certain IS functions e g information sharing and positioning of resources The results also highlight several institutional factors e g mutual interest between members collective problem solving secrecy aspects which are believed to play a key role in the success or failure of the collaborations and which must be addressed in the development of IS support The actors also have substantial basic needs for training e g fire extinguishing first aid and emergency supplies e g fire extinguishers healthcare kits Applying user participation also faced challenges the major one being the development of a future cross sector collaboration in a context that does not yet exist and involving stakeholders from resource strained organisations in doing so The stakeholders and sometimes also the primary end users are partly unknown and tasks are undefined As a response to these challenges a combination of activities based on multiple design groups scenario based Future Workshops focus groups the context specific framework a practical exercise and an after action review was provided The framework which was used to support data collection and user participation includes 15 dimensions each intended to represent important aspects of cross sector collaboration The thesis major contributions are the identified opportunities challenges and need as a sociotechnical ensemble and generated and from several studies thus being comparable The thesis more theoretical contributions is the combined application of the sociotechnical ensemble view and network governance where the studied collaboration forms are characterised as a hybrid form of networks and more traditional government mechanisms and where it is pointed out that network governance lacks explicit IS IT aspects In a wider perspective the research fields of IS and political science may cross fertilise each other when studying emerging cross sector collaboration in the public sector Identified user participation challenges relevant to the cross sector collaboration context suggestions on how they can be handled and the context specific framework are contributions that can be used in practical user centred IS development in similar contexts

The Top Books of the Year Managerial Accounting 14th Edition Exercise 20 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. Managerial Accounting 14th Edition Exercise 20 : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Managerial Accounting 14th Edition Exercise 20 : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
