Geomorphology is the study of the Earth's diverse physical land surface features and the dynamic processes that shape these features. Examining natural and anthropogenic processes, *The SAGE Handbook of Geomorphology* is a comprehensive exposition of the fundamentals of geomorphology that examines form, process, and applications of the discipline. Organized into five substantive sections, the Handbook is an overview of Foundations and Relevance including the nature and scope of geomorphology, the origins and development of geomorphology, the role and character of theory in geomorphology, geomorphology and environmental management, and geomorphology and society. Techniques and Approaches including observations and experiments, geomorphological mapping, the significance of models, process and form, dating surfaces, and sediment, remote sensing in geomorphology, GIS in geomorphology, biogeomorphology, human activity, Process and Environment including the evolution of regolith, weathering, fluids, flows, and fluxes, sediment transport and deposition, hill slopes, riverine environments, glacial geomorphology, periglacial environments, coastal environments, aeolian environments, tropical environments, karst and karst processes, Environmental Change including landscape evolution and tectonics, interpreting quaternary environments, environmental change, disturbance, and responses to geomorphic systems, Conclusion including challenges and perspectives, and a concluding review. The Handbook has contributions from 48 international authors and was initially organized by the International Association of Geomorphologists. This will be a much used and much cited reference for researchers in Geomorphology, Physical Geography, and the Environmental Sciences.

Principles of Practice Management W.E. Fabb, John Fry, 2012-12-06

One of the few real and lasting benefits of international medical meetings is the opportunity to meet, talk, gossip, and get to know colleagues from other countries. So it was that we met, talked, and planned at WONCA World Organization of National Colleges and Academies and Academic Associations of General Practitioners/Family Physicians meetings at Montreux and New Orleans. We realized that although we worked in different places and in different practices, primary health care was essentially the same the world over. Our roles, our problems, our clinical content, our challenges, and objectives were similar whether we work in Europe, North America, Australasia, South Africa, or developing countries. With such similarities, we asked ourselves why not share our common experiences for mutual benefits. The question developed into an idea, and the idea into this book. We started by selecting what we considered were important topics, and then we invited friends and colleagues to join us in putting our experiences and beliefs from years of practice to readers from all over the world to demonstrate our common concerns and to learn from one another.
