Meat A Natural Symbol:

Meat, a Natural Symbol Nick Fiddes, 1991 This is a broad ranging and provocative study of the human passion for meat It will intrigue anyone who has ever wondered why meat is important to us why we eat some animals but not others and how meat is associated with environmental decay *Natural Symbols* Mary Douglas, 2002-09-11 Every natural symbol derived from blood breath or excrement carries a social meaning and this work focuses on the ways in which any one culture makes its selections from body symbolism Each person treats their body as an image of society and the author examines the varieties of ritual and symbolic expression and the patterns of social ritual in which they are embodied *Natural Symbols* is a book about religion and it concerns our own society at least as much as any other It has stimulated new insights into religious and political movements and has provoked re appraisals of current progressive orthodoxies in many fields As a classic it represents a work of anthropology in its widest sense exploring themes such as the social meaning of natural symbols and the image of the body in society which are now very much in vogue in anthropology sociology and cultural studies In this reissue and with a new Introduction *Natural Symbols* will continue to appeal to all students of anthropology sociology and religion

Natural Symbols Professor Mary Douglas, Mary Douglas, 2004-06-01 One of the most important works of modern anthropology Written against the backdrop of the student uprisings of the late 1960s the book took seriously the revolutionary fervour of the times but instead of seeking to destroy the rituals and symbols that can govern and oppress Mary Douglas saw instead that if transformation were needed it could only be made possible through better understanding Expressed with clarity and dynamism the passionate analysis which follows remains one of the most insightful and rewarding studies of human behaviour ever written *Nature Ethics* Marti Kheel, 2008 In *Nature Ethics An Ecofeminist Perspective* Marti Kheel explores the underlying worldview of nature ethics offering an alternative ecofeminist approach Seeking to heal the divisions between the seemingly disparate movements and philosophies of feminism animal advocacy environmental ethics and holistic health Kheel proposes an ecofeminist philosophy that underscores the importance of empathy and care for individual beings as well as larger wholes *Canadian Issues in Environmental Ethics* Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors

Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States

Animal Industries Taina Syrjämaa, Marja Jalava, Taija Kaarlenkaski, Otto Latva, Eeva Nikkilä, Tuomas Räsänen, 2024-04-01 This book examines an extremely topical phenomenon the massive industrial exploitation of animals from a previously neglected perspective It explores the history and development of animal industries in Nordic countries from their establishment in the late nineteenth century to the present day These countries are often considered to be progressive and advanced in animal protection but consumption practices in this area are actually excessive in relation to planetary resources and are among the most unsustainable on a global scale If we want to understand current problems it is essential to be aware of long term changes and continuities as well as the diversity of animals that have been exploited The purpose of this book is to explain these changes and provide new knowledge for scholars in human animal studies decisionmakers and the general public

Animals, Rights and Reason in Plutarch and Modern Ethics Stephen T. Newmyer, 2013-04-15 This groundbreaking volume explores Plutarch's unique survival in the argument that animals are rational and sentient and that we as humans must take notice of their interests Exploring Plutarch's three animal related treatises as well as passages from his ethical treatises Stephen Newmyer examines arguments that strikingly foreshadow those found in the works of such prominent animal rights philosophers as Peter Singer and Tom Regan Unique in viewing Plutarch's opinions not only in the context of ancient philosophical and ethical thought but also in its place in the history of animal rights speculation *Animals Rights and Reasons* points out how remarkably Plutarch differs from such anti animal thinkers as the Stoics Classicists philosophers animal welfare students and interested readers will all find this book an invaluable and informative addition to their reading

Thinking Through the Environment Mark J. Smith, 2005-09-30 This reader brings together material from ecological thought environmental policy environmental philosophy social and political thought historical sociology and cultural studies The extracts tell the story of the way the natural environment has been understood in the modern world and how this has recently been questioned as contemporary societies are seen as characterised by uncertainty and complexity The literature guides the reader through the conventional grounds for thinking about rights and obligations in relation to future generations non human animals and the biotic communities bringing each into question This then leads into a critical examination of social and political theories and their capacity for drawing on ecological thought Each of the seven sections of readings is introduced by the editor who locates the set of readings within the specific themes and issues at the heart of each section

This broad reaching and thought provoking set of readings stresses the diversity of response to environmental problems both within and between anthropocentric and ecocentric approaches and will encourage the reader to examine how they are manifested in the areas of environmental ethics policy analysis and social and political theory Marine and Freshwater Products Handbook Roy E. way the world eats in the twenty first century For years there has been no doubt that widespread consumption of meat is both environmentally destructive and morally dubious A growing chorus of scientists health experts and activists champion the benefits of a plant based diet Nevertheless change has been slow to arrive and the chasm between our appetites and our collective well being seems impossibly vast We know we must transition to a more plant based world But what would such a world look like and how do we realistically get there One group of people has been grappling with this question for decades vegans Once mocked for its hempy puritanism the vegan movement has grown from a fringe identity into a veritable cultural juggernaut Yet visions of what our food system should look like continue to conflict Is the healthful vegan lifestyle appealing or alienating Are high tech meat alternatives merely a repeat performance of harmful fast food values Is modern veganism itself misguided a wrong answer to the right questions In *The Good Eater* Harvard trained sociologist and vegan Nina Guilbeault PhD vividly explores the movement s history and its present day tensions by grappling with the most fundamental question of all Is there a truly ethical way to eat What emerges is a fascinating portrait of how social change happens with profound implications for our plates and our planet

Animals and Agency Sarah McFarland,Ryan Hediger,2009-06-02 While many scholars who write about animals deal with animal agency in some way this volume is the first to position the question of nonhuman agency as the primary focus of inquiry Section I presents studies of actual animals demonstrating agency Section II moves agency into new terrain while considering key representations of animal agency in literature Section III analyzes animals as mediators and as conveyances of human to human communication and Section IV investigates the agency of beings who defy conventional species categories The *Envoi* demonstrates how the microscopic polyp is interwoven into notions of agency and mythical superagency This volume s interdisciplinary explorations press hard on issues of agency to open up space for more questions about how we can understand relationships between the human and the nonhuman

Simons,2001-12-03 This book addresses the question of animal rights in the context of literary criticism Working from a committed position it asks the question What would literary studies look like if we took animal rights seriously It offers critical surveys of the main themes in the history of animal rights and some of the more important contemporary positions together with readings of a wide range of literary texts from classical antiquity to the present day Problems in Biblical Theology Henry T. Jonson Francis Bacon and Richard Overton are re examined and the status of humanity comes under question Perceiving Animals argues that within early modern English culture there is an uncomfortable sense of humanity with a superiority which is not innate but dangerously unnatural
