Carpenter, Timothy D. Comar, 2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology

students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see

Teaching for Change

Kathryn Geismar,Guitele Nicoleau,1993 Teaching For Change is a unique and indispensable collection of articles that speaks directly to college educators about classroom learning and issues of difference The contributors describe how they address issues of race gender and class in their courses and attempt to ensure that their curricula and class discussions represent the perspectives of all students The contributors who all teach at the college level first provide the background situations at their institutions that led them to develop their curricula and courses They then describe and evaluate the practical methods they use to encourage students to re think their assumptions and behavior around issues of difference And finally they address an important element of classroom learning the difficulty of breaking down barriers that prevent productive dialogue about these issues Teaching for Change provides concrete examples of successful curricula that enhance the learning process for all students making it an essential resource for today s college educators
