Hendrix, 2019-12-10 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject CBT: The Cognitive Behavioural

Tsunami Farhad Dalal, 2018-09-25 Is CBT all it claims to be The Cognitive Behavioural Tsunami Managerialism Politics and the Corruptions of Science provides a powerful critique of CBT s understanding of human suffering as well as the apparent scientific basis underlying it The book argues that CBT psychology has fetishized measurement to such a degree that it has come to believe that only the countable counts It suggests that the so called science of CBT is not just bad science but corrupt science The rise of CBT has been fostered by neoliberalism and the phenomenon of New Public Management The book not only critiques the science psychology and philosophy of CBT but also challenges the managerialist mentality and its hyper rational understanding of efficiency both of which are commonplace in organizational life today The book suggests that these are perverse forms of thought which have been institutionalised by NICE and IAPT and used by them to generate narratives of CBT s prowess It claims that CBT is an exercise in symptom reduction which vastly exaggerates the degree to

which symptoms are reduced the durability of the improvement as well as the numbers of people it helps Arguing that CBT is neither the cure nor the scientific treatment it claims to be the book also serves as a broader cultural critique of the times we live in a critique which draws on philosophy and politics on economics and psychology on sociology and history and ultimately on the idea of science itself It will be of immense interest to psychotherapists policymakers and those concerned about the excesses of managerialism

Shadow Education and Social Inequalities in Japan Steve R.

Entrich,2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide It sheds light on the causes of this high dependence on shadow education and its implications for social inequalities The book provides a deep and extensive understanding of the role of this kind of education in Japan It shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses Contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education Against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly Western societies without traditional large scale shadow education markets The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable

Comparative Sociology of Examinations Fumiya Onaka,2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non Western countries tend to conduct detailed multi layered and continuous systems of tests or examinations International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries Examinations therefore provide a methodological pivot for comparing a range of societies They enable us to contrast the West and the East the North and the South tribal and mass society ancient and postmodern civilization and so on Comparing parallel societies from across Asia the Middle East Europe and North America this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations It uses ethnographies interviews questionnaires documents statistics and big data analyses to make comparisons on broad scales of time and space In so doing it suggests hypotheses encompassing different kinds of societies in human history including those in the Axial Age and the Modern Ages
