

## **Feasibility Report**

A feasibility report is written to report the methods and findings of a feasibility study. A feasibility study is done to determine if an existing program is efficient; in addition, a feasibility study can be done to examine a potential program. Usually, the study's ultimate goal is to determine the success of a project based upon two important criteria: the cost of the project and the future value of the project.

Most feasibility reports are done collaboratively with various participants providing the research for their various interests or skills. The information is then brought together, and one person will work on the organization of the report. Each member of the team should have written a small report on his or her specific task so that the person writing the report will only need to compile the information in an organized manner, provide transitions between each section, and, after the report is written, organize the front and back matter.

Once the report is written, it is the responsibility of the entire group to revise and edit the draft.

### **1. Steps:**

- A. Analyze the needs of your audience.
- B. Examine the context and purpose of the study.
- C. Organize the information into content sections.
- D. Determine the order of the information.

### **2. Organization: (Refer to the Formal Report resource.)**

- A. Front Matter—executive summary, title page, table of contents, abstract, preface, brief and summary.
- B. Body—introduction, body, conclusion, and recommendations.
- C. Back Matter—appendices, glossary, index, and bibliography.

**Federal Register** ,2005-11      The Routledge International Handbook of Online Deviance Roderick S. Graham,Stephan G. Humer,Claire Seungeun Lee,Veronika Nagy,2024-09-16

Covering a wide range of different online platforms including social media sites and chatrooms this volume is a comprehensive exploration of the current state of sociological and criminological scholarship focused on online deviance

Understanding deviance broadly the handbook acknowledges both an objective normative approach and a subjective reactivist approach to the topic putting into sharp relief the distinctions between cybercrime and online deviance on the one hand and wider concerns of online communities related to online deviance on the other

Divided into five sections the first section is devoted primarily to scholarship about the theories and methods foundational to exploring online deviance

The second section Gender Sex and Sexuality presents empirical research on expressions of gender sex and sexuality in online spaces considered deviant

The third section Violence and Aggression highlights scholarship on types of violent communications such as hate speech and cyberstalking

The fourth section Communities and Culture describes empirical research on online communities and networks that can be described as deviant by wider society

Lastly the fifth section Regional Perspectives highlights research in which a terrestrial location is impactful to the online phenomena studied

Providing a window into future scholarship over the next several years and acknowledging the ephemeral nature of research on digital technology

The Routledge International Handbook on Online Deviance is essential reading for students and scholars of Criminology and Sociology focused on deviant online behaviour

It will also appeal to those working in related areas within Internet Digital Studies Media Communication Studies Psychology and Cybersecurity

studies in this thesis employ both quantitative Studies I II and III and qualitative Studies II and IV research methods The sample in Study I n 611 were recruited in the Netherlands The participants n 7 in Study II were recruited via advertisements in Swedish newspapers Studies III and IV used the same cohort of participants Study III n 50 Study IV n 13 These participants were recruited via an invitation letter sent to all persons who had made contact with healthcare services in relation to heart failure during the previous year at the clinics of cardiology or medicine in four hospitals in southeast Sweden Study I had a quantitative longitudinal design Data on depressive symptoms was collected at baseline discharge from hospital and after 18 months Data on mortality and hospitalisation was collected at 18 and 36 months after discharge from hospital Study II employed three different patterns of design as follows I The development and context adaptation of the ICBT program was based on research literature and clinical experience and performed within a multi professional team II The feasibility of the program from the perspective of limited efficacy and function was investigated with a quantitative pre post design III Participants experience of the ICBT program was investigated with a qualitative content analysis Data on depressive symptoms was collected pre and post intervention The time used for support and feedback was logged during the intervention and qualitative interviews were performed with the participants after the end of the intervention Study III was designed as a randomised controlled trial A nine week ICBT program adapted to persons with heart failure and depressive symptoms was tested against an online moderated discussion forum Data on depressive symptoms HrQoL and cardiac anxiety was collected at baseline before the intervention started and after the end of the intervention approximately 10 weeks after the start of the intervention Study IV had a qualitative design to explore and describe participants experiences of ICBT The participants were recruited from within the sample in Study III and all had experience of ICBT Data collection occurred after the ICBT program ended and was carried out using qualitative interviews by telephone Results The mean age of the samples used in this thesis varied between 62 and 69 years of age Concerning the symptom severity of heart failure most persons reported New York Heart Association NYHA class II 40 57% followed by NYHA class III 36 41% Ischaemic heart disease was the most common comorbidity 36 43% The vast majority had pharmacological treatment for their heart failure Six percent of the persons in Study I used pharmacological antidepressants In Studies II and III the corresponding numbers were 43% and 18% respectively Among persons hospitalised due to heart failure symptoms 38% reported depressive symptoms After 18 months 26% reported depressive symptoms Four different courses of depressive symptoms were identified 1 Non depressed 2 Remitted depressive symptoms 3 Ongoing depressive symptoms 4 New depressive symptoms The highest risk for readmission to hospital and mortality was found among persons in the groups with ongoing and new depressive symptoms A nine week ICBT program consisting of seven modules including homework assignments on depressive symptoms for persons with heart failure was developed and tested The RCT study Study III showed no significant difference in depressive symptoms between ICBT and a moderated discussion forum Within

group analysis of depressive symptoms demonstrated a significant decrease of depressive symptoms in the ICBT group but not in the discussion forum group The participants experience of ICBT was described in one theme ICBT an effective but also challenging tool for self management of health problems This theme was constructed based on six categories Something other than usual healthcare Relevance and recognition Flexible understandable and safe Technical problems Improvements by live contact Managing my life better Conclusion After discharge from hospital depressive symptoms decrease spontaneously among a large proportion of persons with heart failure though depressive symptoms are still common in persons with heart failure that are community dwelling Depressive symptoms in persons with heart failure are associated with increased risk of death and hospitalisation The highest risks are found among persons with long term ongoing depressive symptoms and those developing depressive symptoms while not hospitalised ICBT for depressive symptoms in heart failure is feasible An intervention with a nine week guided self help program with emphasis on behavioural activation and problem solving skills appears to contribute to a decrease in depressive symptoms and improvement of HrQoL When ICBT is delivered to persons with heart failure and depressive symptoms the participants requests that the ICBT is contextually adapted to health problems related to both heart failure and depressive symptoms ICBT is experienced as a useful tool for self care and something other than usual healthcare ICBT also requires active participation by the persons receiving the intervention something that was sometimes experienced as challenging

Khayyat,Goran M. Muhamad,2023-07-07 This book is a collection of eight studies covering several areas pertinent to the current technological and banking services situation in the Kurdistan region of Iraq The economy of the Kurdistan Region of Iraq KRI is mainly dependent on oil revenue The oil export revenue constitutes more than 90% of the government s fiscal revenue In addition to that the public sector plays an excessive role in the economy with public spending to GDP being over 70% while revenue from taxation constitutes less than 30% of total revenue As the economy is not diversified there is a large gap between demand and supply of locally produced tradeable goods leaving the KRI economy highly dependent on imports Another structural challenge of the KRI economy is its dependence on cash and a weekly financial system Although the region has witnessed extraordinary economic growth from 2008 to 2014 the growth rate decreased from 8 to 1 percent trade and investment dropped to 5 percent and the

unemployment rate significantly increased to over 20% by the end of the year 2019 To maintain the progress of economic development it is necessary to upgrade the country s industrial structure in order to be able to generate more value added products which requires advancement in technological infrastructure to employ more sophisticated technologies There is not much written about Kurdistan and its economy and yet there is a comprehensive development plan and resources to be used for education research rehabilitation development and reconstruction As such this book would be of interest to researchers decision makers governmental and non governmental organizations undergraduate and graduate students and the general public with an interest in the Middle East and contemporary Kurdish issues It is a good up to date handbook for policymakers and NGOs involved in the rehabilitation reconstruction and development of Iraq
