America the Ingenious Kevin Baker, 2016-10-04 Among the many rewards of America the Ingenious Kevin Baker's survey of Yankee know how is stumbling on its buried nuggets Baker examines a wide range of the

achievements that have made and still make America great again and again The Wall Street Journal All made in America The skyscraper and subway car The telephone and telegraph The safety elevator and safety pin Plus the microprocessor amusement park MRI supermarket Pennsylvania rifle and Tennessee Valley Authority Not to mention the city of Chicago or jazz or that magnificent Golden Gate Bridge What is it about America that makes it a nation of inventors tinkerers researchers and adventurers obsessive pursuers of the never before created And equally what is it that makes America such a fertile place to explore discover and launch the next big thing In America the Ingenious bestselling author Kevin Baker brings his gift of storytelling and eye for historical detail to the grand and grandly entertaining tale of American innovation Here are the Edisons and Bells and Carnegies and the stories of how they followed their passions and changed our world And also the less celebrated like Jacob Youphes and Loeb Strauss two Jewish immigrants from Germany who transformed the way at least half the world now dresses hint Levi Strauss And Leo Fender who couldn't play a note of music midwifing rock n roll through his solid body electric guitar and amplifier And the many women who weren't legally recognized as inventors but who created things to make their lives easier that we use every day like Josephine Cochran inventor of the dishwasher or Marion O'Brien Donovan who invented a waterproof diaper cover Or a guy with the improbable name of Philo Farnsworth who with his invention of television upended communication as significantly as Gutenberg did At a time when America struggles with different visions of what it wants to be America the Ingenious shows the extraordinary power of what works how immigration leads to innovation what a strong government and strong public education mean to a climate of positive practical change and why taking the long view instead of looking for short term gain pays off many times over not only for investors and inventors but for the rest of us whose lives are made better by the new America and its nation of immigrants have excelled at taking ideas from anywhere and transforming them into the startling often unexpectedly beautiful creations that have shaped our world This is that story

author of the Memphis Cold Case novels **Black Monday** Bob Reiss,2007-02-13 A plague that will cause the death of millions A plague that will destroy countries A plague that will plunge the world into a dark age A plague that will make nobody sick When the first planes go down in Europe in California in Asia authorities blame terrorists All flights are grounded as world leaders try to figure out how the global assault has been coordinated And when cars ships and factories stop running too it becomes clear that the common link is oil Somehow a microbe genetically engineered to destroy petroleum has infected the world supply The world descends into a new dark age Dr Gregory Gillette an epidemiologist with the Centers for Disease Control is a disease hunter specializing in microbes that attack human beings When the Pentagon taps him to be part of the Rapid Response Team assembled to track and kill the devastating Delta 3 bacteria he quickly discovers that his expertise is ignored his presence meaningless The leader of the task force is an old nemesis who sidelines Gillette Gillette returns home to Washington where he watches in horror as food becomes scarce neighbor attacks neighbor and government collapses With winter approaching the capital faces anarchy and Gillette faces a choice to stay with his family or to disobey orders and find the microbes antidote through clues that may not even be real Little Woods Steve Campbell,2008-03 In 1833 a young lightning scarred oak tree grows near a village of Potawatomi Indians the Neshnabek Here Watseka and her family must fight to save themselves from the onslaught of white migration and disease in the Little Woods But the mandates of the Indian Removal Act of 1830 and the atrocities of the Black Hawk War of 1832 serve to undermine the Neshnabek s bargaining position as they relinquish their legacy through the Treaty of Chicago and prepare for their removal to the west That same venerable oak stands in twenty first century St Charles Illinois and bears witness to violence despair and hope in the McCallum family s fight to surmount turmoil inflicted by the encroaching world When her job is outsourced to Venezuela Marilyn McCallum falls into clinical depression Her husband Lloyd sinks into the compulsion of illegal sports betting after his profession is supplanted by a superabundance of Chinese engineers But with adversaries and allies emerging from surprising places the McCallums must come to quick terms with their new reality The fate of these two culturally diverse families living in different eras of Illinois history merge in Little Woods a gripping tale of globalization s disturbing effect on life in the present and the past that offers a sobering view of our future **9/11 Fiction, Empathy, and Otherness** Tim Gauthier,2015-04-02 9 11 Fiction Empathy and Otherness analyzes recent works of fiction whose principal subject is the attacks of September 11 2001 The readings of the novels question and assess the validity and potential effectiveness of both the subsequent calls for a cosmopolitan outlook and the related but no less significant emphasis placed on empathy and exhibited in such recent studies as Jeremy Rifkin s The Empathic Civilization Karsten Stueber s Rediscovering Empathy and Julinna Oxley s The Moral Dimensions of Empathy As such this study examines the extent to which us and them narratives proliferated after 9 11 and the degree to which calls for greater empathy and a renewed emphasis on cosmopolitan values served to counterbalance an apparent movement towards increased polarization

encapsulated in the oft mentioned clash of civilizations A principal objective of the book is thus to examine the ethical and political implications revealed in the exercising or withholding of empathy For though empathy in and of itself may not be sufficient it is nevertheless a vital component in the generation of actions one might identify as cosmopolitan In other words this book examines the responses to 9 11 in both Western and non Western novels in order to uncover what their dramatic renderings might tell us about the possibility of a truly globalized community The attainability of any cosmopolitan engagement is contingent upon our abilities to understand the other knowing always that otherness eludes our grasp and the best we can do is imagine some version of it It is primarily in this capacity that the novel has a role to play Whether it is the challenge of connecting with the survivors of trauma and the inhabitants of a traumatized city or with a hyperpower that has experienced its own vulnerability for the first time or even with the terrorist who seeks to commit violent acts these novels afford us the means of examining the complex dynamics involved in any exhibition of fellow feeling for the other and the ever present potential failure of that engagement

Eclipse of the Blue D. E. Gray, 2012-10 For the Retired Blues Crew a small group of retired LAPD police officers that meet once a month to share old war stories and enjoy each other s company accepting retirement was a hard pill to swallow Once considered savvy street warriors who risked life and limb protecting the good citizens of Los Angeles they were now the forgotten heroes whose past heroic deeds were now only remembrances visited through their colorful story telling during their once a month get togethers Like all things in life they were all expendable and the guys in the Retired Blues Crew had been replaced by a new generation of street warriors To the old dogs who were put out to pasture the new centurions were taking their places with new technology and a confidence that bordered on disrespect for those who had paved the way before them The argument that the old days of crushing crime without the benefit of all the new fangled gadgets was more rewarding than the technology of the future was a misconception of the new breed that were now in charge of protecting the citizens of Los Angeles For the select group of old story tellers they needed to add one more chapter in their lives something for the street warriors of the present to remember them by when their time finally came and they were reduced to second class citizens too old to do the job anymore This small tight knit group of old street warriors had enough and it was time to prove beyond a shadow of a doubt that they weren t too old to out smart and out wit the high tech rouges who have now taken their places Proving that computers and gadgets could never replace the wisdom and experience that the old dogs were blessed with wouldn t be an easy task but they were determined to challenge the new breed and beat them at their own game They knew whatever it was they were going to do couldn t replicate anything like the violent movies you see where people die get hurt or cars get wrecked and buildings are blown up after all they were cops or at least they were once That being said the old dogs had to pull off the perfect caper and they had to do it without claiming any of the bragging rights they so much yearned for It would have to be for no other reason than For Greater Glory In that one of their own had been diagnosed with cancer with less than six months to live they only had a

small window of opportunity to get it done Since he was the architect behind the perfect crime referred to as Operation Blue Eclipse their success would depend on how well the plan was executed with no room for error If all went as planned and after all was said and done the Retired Blues Crew would truly know who the best of the best was **Black Monday** R. Scott Reiss, 2007 In the wake of a globally disastrous plague involving a microbe that consumes oil while destroying all gas operated machinery the survival of the world's governments and markets falls on the shoulders of a single individual
