

Introducing the Genesis® Pro, a competition-quality bow with an adjustable draw stop that lets you customize your draw length!

Like the original Genesis bow, the Genesis Pro will fit virtually everyone. Thanks to its easy-to-adjust grip, the new Genesis® Pro has an adjustable draw stop that provides the power with a "hard wall" which allows shooting with a mechanical release and more.

Genesis

Competition composite limbs

Mounted idler wheel

Limbs in the idler wheel are made of a very low-friction synthetic material which reduces friction.

Limbs and Limb Bolts

The limbs on your Genesis Pro bow are adjustable to suit you or the bow. They store the potential energy you put into the bow until the string is released. As the moment of release, the stored potential energy is transferred into string to motion, and the arrow is propelled toward the target.

The limb bolts adjust the draw to fit you and are also used to adjust the draw length on your bow. Using a 1/4" hex wrench, the limb bolts can be turned in a counterclockwise direction to decrease the draw length of the bow to a minimum of 15 lbs. Turning the limb bolts clockwise will increase the bow to its maximum of 35 lbs. One full turn equals approximately 1/4 lbs. of draw weight. The limb bolts on each limb should always be turned the same number of turns when adjusting draw weight.

Genesis Pro Bowstring System

The Genesis Pro bow features single cam design. The idler wheel cam allows the bow to maintain its set percentage throughout the draw cycle. The idler wheel cam sits on the cam cables and guides the bow string. When the bowstring is released, the cam creates a "hard wall" which results in a better arrow while increasing bow speed.

Draw Stop

Customizing the Genesis Pro to your draw length is easy!

The draw stop on the Genesis® Pro is adjusted with an Allen wrench. Simply turn the draw stop counter-clockwise until it is completely removed. Draw it to the desired draw stop position, tighten with security in place. Use the larger diameter draw stop to adjust to 12" (approx.) increments and the smaller diameter draw stop to adjust to 1" (approx.) increments.

Grip

The double-finger grip on your Genesis bow is actually designed to fit the contours of your hand, providing both comfort and consistency.

Bowstring

We equip each Genesis Pro bow with a high-strength, durable bowstring made from some of the best materials. The bowstring provides superior performance, ensuring that the maximum amount of the bow's stored energy is transferred to the arrow.

Power Cable and Cable Guard

The power cable is the second component of the bowstring assembly. It is anchored at the ends on the upper limb and wraps around the idler wheel on the rear limb. It is mounted on the lower limb.

The cable guard is the metal rod which supports the sliding cable cap and keeps the cable safely off to one side and out of the light path of the arrow.

Mounting Plate

You or your local pro shop must properly install a string rest to ensure proper arrow position on the string for repeatable accuracy.

WARNING: Please confirm that arrow rest are in proper length and adjust to your bow's draw weight and draw length. Test and follow your arrow manufacturer's recommendations.

Genesis Pro Features

Draw

The rear handle section on your Genesis Pro bow is machined 6061 T6 aluminum. This material is engineered to provide the Genesis Pro with optimal balance while being built extremely durable and very lightweight.

Larger reinforced clearance area

An increased range of camless adjustment accommodates many modern bows and allows for increased bow string accommodation. The Genesis Pro does not include a rest. Choose a rest that suits your needs and shooting style.

Idler Wheel

The idler wheel is located at the upper limb of the bow. The main function of the idler wheel is to transfer stored energy from the bow limbs back through the string to the arrow in a smooth and consistent way. The
