ECGBL2015-9th European Conference on Games Based Learning Robin Munkvold and Line Kolås, 2015-09-18 These proceedings represent the work of researchers participating in the 9th European Conference on Games Based Learning which is being hosted this year by Nord Trondelag University College Steinkjer Norway on the 8-9 October 2015. The Conference has become a key platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different areas and specialties within Games Based Learning. It also offers the opportunity for like-minded individuals to meet, discuss and share knowledge. ECGBL continues to evolve and develop and the wide range of papers and topics will ensure an interesting two-day conference. In addition to the main streams of the conference, there are mini-tracks focusing on the areas of the design of multiplayer collaborative serious games, applied Games and gamification, the teacher's role in game-based learning, games for STEM, Science, Technology, Engineering, Mathematics, learning assessment of digital game-based learning and pervasive and ubiquitous gaming for learning. In addition to the presentations of research, we are delighted to host the third year of the Serious Game competition which provides an opportunity for educational game designers and creators to participate in the conference and demonstrate their game design and development skills in an international competition. This competition is again sponsored by SEGAN Serious Games Network. With an initial submission of more than 60 games, 28 finalists will present their games at the conference. Prizes will be awarded to the games judged to demonstrate the best quality and originality of game play itself and the positioning and articulation of the game's contribution to the educational domain. With an initial submission of 190 abstracts, after the double-blind peer review process, there are 75 research papers: 15 PhD research papers, 4 Non-Academic papers and 8 work-in-progress papers published in these Conference Proceedings. These papers represent research from more than 40 countries including Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Israel, Italy, Japan, Malaysia, Norway, Portugal, Russia, Saudi Arabia, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, ROC, The Netherlands, The Netherlands, United Arab Emirates, UK and USA. **Computer Assisted Assessment. Research into E-Assessment** Eric Ras, Desirée Joosten, ten Brinke, 2015-12-23 This book constitutes the refereed proceedings of the 18th International Conference on Computer Assisted Assessment CAA 2015 held in Zeist, The Netherlands in June 2015. The 15 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers present current developments in technology-enhanced assessment. Topics covered include automatic item generation, computer-adapted testing, the use of multimedia in assessment, e-assessment policies. **Learning, Design, and Technology** J. Evolutionary Ecology of Termites Alberto Arab,Solange Del Carmen Issa Ponce,Daniel Aguilera-Olivares,2023-08-16

Termites are eusocial insects that live in colonies composed of hundreds to millions of individuals Their colonies are mainly organized into reproductive and non reproductive castes which have specific tasks such as nest construction foraging reproduction brood care and colony defense The evolution of the symbiotic association between termites and microorganisms allows them to decompose ingested lignocellulose from plant substrates such as wood including herbivore dung and soil humus making them important insect decomposers that play a crucial role in ecosystem functioning by contributing to litter decomposition soil formation and nutrient cycling On the other hand termites have recently been classified as eusocial cockroaches which have gained increasing attention in evolutionary studies to understand the transition to eusociality from subsocial wood roaches This current growing interest in termite research calls for a collection dedicated to these fascinating insects *Federal Register* ,2012-08 *Multilingualism in European Language Education* Cecilio Lapresta-Rey,Ángel Huguet,2019-05-09 This book explores how different European education systems manage multilingualism Each chapter focuses on one of ten diverse settings Andorra Asturias the Basque Country Catalonia England Finland France Latvia the Netherlands and Romania and considers how its education system is influenced by historical sociolinguistic and legislative and political processes and how languages are handled within the system stressing the challenges and opportunities in each area of study The chapters provide the reader with insights around three key aspects the management of the guarantee of the rights of regional language minorities the incorporation of the language background inherited by immigrants living in Europe whether they are European citizens or not and the need to promote the learning of international languages

Individually the chapters offer deep insights into a specific education system and together the studies allow for a comparison and holistic understanding of multilingualism in European education **International Perspectives on Knowledge**

Integration Thomas Lehmann,2020-05-18 Interest in knowledge integration grew considerably in recent years particularly within the realm of pre service teacher education However studies on the topic conceptualize knowledge integration in diverse ways For example it may be conceived as a specific coherence building learning process which involves not only acquiring but interrelating knowledge of different types e g theoretical and practical or from different domains which

together constitute a teacher's or educational specialist's professional knowledge base e.g. content knowledge, pedagogical knowledge, pedagogical content knowledge, knowledge about using technologies for learning and instruction etc. Furthermore, knowledge integration also refers to the meaningful application of knowledge of different types and from various domains in order to act professionally and to teach successfully. In many countries, however, future teachers and educational specialists often struggle with knowledge integration because the task of integrating knowledge across domains from various courses and from practical training is left largely to the individuals. Thus, the efficacy and quality of higher education programs, particularly in pre-service teacher education, could be improved through careful attention to knowledge integration.

International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice. Specifically, it explores theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration. It is thus of interest to researchers, faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology.

Understanding Terrestrial Microbial Communities Christon J. Hurst, 2019-03-27. This book presents a summary of terrestrial microbial processes which are a key factor in supporting healthy life on our planet. The authors explain how microorganisms maintain the soil ecosystem through recycling carbon and nitrogen and then provide insights into how soil microbiology processes integrate into ecosystem science, helping to achieve successful bioremediation as well as safe and effective operation of landfills and enabling the design of composting processes that reduce the amount of waste that is placed in landfills. The book also explores the effect of human land use, including restoration, on soil microbial communities and the response of wetland microbial communities to anthropogenic pollutants. Lastly, it discusses the role of fungi in causing damaging and often lethal infectious diseases in plants and animals.
