Hurricane Resistant Construction Manual:

Hurricane Resistant Construction Manual Southern Building Code Congress International, United States. National Oceanic and Atmospheric Administration, 2005 The properties along the American Coast are one of the most sought after properties in the United States People are swarming to buy or build on beach property on the Atlantic Gulf and Pacific Coast The increase in population and building has created many problems Beaches are getting smaller and building density is increasing This increasing density increases the changes for large developed areas to be in the path of a hurricane and the larger the developed area the greater the potential for property loss and deaths Both coastal development will continue and hurricanes be spawned and make landfall If we are to minimize property loss along our coast we must construct buildings that will resist the water and wind forces in hurricanes The purpose of this manual is to provide design and construction details and technique for improving coastal construction *Hurricane Resistant Construction Manual* Southern Building Code Congress International, 1986
