Learners Jessica A. Curtis, 2019-06-12 As adult instruction becomes a more common part of library practice, librarians need guidance in an area that may not always have been a part of their library science education. This book provides the instruction necessary to instruct adult patrons. Presenting complex concepts and ideas in an easy to understand format, this book applies learning theory to real life situations and provides a much needed resource for those responsible for or seeking to instruct adults in library settings. The book introduces learning principles and techniques that will enhance your classes, programs and one on one interactions as well as increase the memory retention of participants. It will help you not only to promote learning but also to create positive library interactions and build retention. Current library instructional and theoretical texts address instructional programming but do not explain how the instructor handles learning instruction differently for individuals, general audiences and specific audiences or in passive situations such as through handouts or online interactions. This guide differs from other works in that it addresses all adult services positions, not only those with the title of instructional librarian and addresses the full scope of instruction that librarians need to better meet patron needs.

Professionalizing Multimodal Composition Santosh Khadka, Shyam B. Pandey, 2023-06-15 Multimodal composition is becoming increasingly popular in university classrooms as faculty, students and institutions come to recognize that old and new technologies have enabled and even demanded the use of more than one composing mode for communicating, solving problems and keeping up with the latest discourse. Professionalizing Multimodal Composition embraces and enacts multimodal composition in various writing courses and programs by exploring institutional, programmatic and individual faculty initiatives for capacity building and human resource development across institutions. Academic leaders, scholars and faculty who have successfully designed and launched academic programs or faculty development initiatives discuss the theoretical and logistical questions considered in their design, the outcomes they achieved and how others can emulate them. This exchange of knowledge, insight, experiences and lessons learned among community members is critical for enabling or

inspiring other programs departments and institutions to conceive design and launch academic programs or faculty development initiatives for their own faculty The larger goal of professionalizing is to work with teaching faculty to increase their interactional expertise with multimodal composition and this collection offers a set of models for how faculty can do that at their own institutions and in their own programs
