Infrastructure Redux N. Lahore in Motion Ammara Maqsood, Chris Moffat, Fizzah Sajjad, 2025-02-18 Lahore in Motion provides a portrait of the Pakistani metropolis by tracing the path of the city's first metro rail corridor Construction for this major piece of public infrastructure began in 2015 and over subsequent years the nascent Orange Line rapidly reconfigured Lahore's urban landscape displacing residents and slicing through existing structures along its route all while offering Lahoris the promise of world class public transportation The volume collects stories from a series of walks along the metro's 27 kilometre path bringing together a wide variety of authors including academics and activists architects and artists to reflect on the relationship between urban change and belonging in a historic city Each chapter is organised around a particular station on the metro but the volume moves far beyond the neighbourhoods shadowed by the train's elevated track Contributors navigate the friction generated by the Orange Line's construction and reflect on how this project of connection both responds to and produces fragmentation in the urban environment The book brings together critical insights on the politics of infrastructure in South Asia and the desires and dispossessions fuelling projects of development in the Global South assessing how they unevenly inflect the intimate rhythms of everyday life in one of the world's most populous cities

Transnational Frontiers of Asia and Latin America since 1800 Jaime Moreno Tejada, Bradley Tatar, 2016-08-19

Frontiers are wild The frontier is a zone of interaction between distinct polities peoples languages ecosystems and economies but how do these frontier spaces develop If the frontier is shaped by the policing of borders by the modern nation state then what kind of zones regions or cultural areas are created around borders This book provides 16 different case studies of frontiers in Asia and Latin America by interdisciplinary scholars charting the first steps toward a transnational and transcontinental history of social development in the borderlands of two continents Transnationalism provides a shared focus for the contributions drawing upon diverse theoretical perspectives to examine the place making projects of nation states Through the lenses of different scales and time frames the contributors examine the social processes of frontier life and how the frontiers have been created through the exertions of nation states to control marginal or borderland peoples The most significant cases of industrialization resource extraction and colonization projects in Asia and Latin America are examined in this book reveal the incompleteness of frontiers as modernist spatial projects but also their creativity as sources of new social patterns new human adaptations and new cultural outlooks and ways of confronting power and privilege The incompleteness of frontiers does not detract from their power to move ideas peoples and practices across borders both territorial and conceptual In bringing together Asian and Latin American cases of frontier making this book points toward a comparativist and cosmopolitan approach in the study of statecraft and modernity For scholars of Latin America and or Asia it brings together historical themes and geographic foci providing studies accessible to researchers in anthropology geography history politics cultural studies and other fields of the human sciences

Private Cities Yue Li, Martin Rama, 2023-06-15 Institutional constraints and weak capacity often hamper the ability of local governments in developing countries to steer urbanization As a result there are not enough cities to accommodate an unabated rural urban migration and many of those that exist are messy sprawling and disconnected The flipside is the emergence of entire cities more than gated communities or industrial parks led in whole or in part by private actors To date little systematic research has been conducted on the conditions that are necessary for such unusual entities to emerge on the roles played by private actors or on the consequences for efficiency and equity Private Cities Outstanding Examples from Developing Countries and Their Implications for Urban Policy aims to fill this gap Using an analytical framework that draws on urban economics and political science it includes inventories of private cities in the Arab Republic of Egypt India Indonesia and Pakistan and provides structured reviews of 14 outstanding examples across all developing regions Nongovernment actors turn out to be diverse they include not only major companies and large developers but also business associations civil society organizations and even foreign countries The way local governments interact with these nongovernment actors varies as well from deliberate neglect to joint ventures Private actors take on some but not all local government functions while at times embracing unconventional roles And while private cities tend to be economically successful they can lead to environmental degradation social segregation and even institutional secession Increasing the capacity of local governments in developing countries will take time Along the way inefficient spatial development patterns may be locked in There is a case for selectively tapping into the comparative advantage of significant private actors while actively using policy tools to avoid the potential shortcomings In the spirit of a public-private partnership for urbanization land value capture would be at the center of this approach
