*Research evaluation metrics* Das, Anup Kumar, 2015-04-27 Traducción parcial de la Introducción En la actualidad la evaluación de la investigación es una cuestión que se está replanteando en todo el mundo En algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos Por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non Cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación Con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron La tendencia continuó y después de la Segunda Guerra Mundial la investigación comenzó a crecer exponencialmente Hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millones de trabajos de investigación y otros documentos por año En este contexto la evaluación de la investigación es una cuestión de primera importancia Para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados De entre estos seleccionar el mejor candidato es una cuestión difícil de determinar Las evaluaciones inter pares en muchos casos están demostrando ser subjetivas En 1963 se crea Science Citation Index SCI que cubre la literatura científica desde 1961 Unos años después Eugene Garfield fundador del SCI preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación El documento titulado Pueden predecirse los ganadores del Premio Nobel Fue publicado en 1968 Garfield y Malin 1968 En el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo Derek H.R. Barton y Murray Gell-Mann recibieron el codiciado premio Esto reivindicó la utilidad del análisis de citas Cada año varios científicos pertenecientes al campo de la Física Química Fisiología y Medicina reciben el Premio Nobel De esta manera el análisis de citas se convirtió en una herramienta útil Sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas Incluso Garfield comentó El uso del análisis de citas de los trabajos de evaluación es una tarea difícil Existen muchas posibilidades de error Garfield 1983 Para la evaluación de la investigación se necesitaban algunos otros indicadores El análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos Pero se necesita algo que sea más exacto La llegada de la World Wide Web WWW brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la WWW Traducción de Julio Alonso Arvalo Univ. Open Access and the Future of Scholarly Communication Kevin L. Smith,Katherine A. Dickson,2016-10-05 It is impossible to imagine the future of academic libraries without an extensive consideration of open access the removal of price and

permission barriers from scholarly research online As textbook and journal subscription prices continue to rise improvements in technology make online dissemination of scholarship less expensive and faculty recognize the practical and philosophical appeal of making their work available to wider audiences As a consequence libraries have begun to consider a wide variety of open access flavors and business models These new possibilities have significant impact on both library services and collection policies and the call for new skills within library staffing Volume 9 of the series *Creating the 21st Century Academic Library* is the first of two addressing the topic of open access in academic libraries and focuses on policy and infrastructure for libraries that wish to provide leadership on their campus in the transition to more open forms of scholarship Chapters in the book discuss how to make the case for open access on campus as well as the political and policy implications of libraries that themselves want to become publishing entities Infrastructure issues are also addressed including metadata standards and research management services Also considered here is how interlibrary loan preservation and the library's role in providing textbooks support the concept of open access It is hoped that this volume and the series in general will be a valuable and exciting addition to the discussions and planning surrounding the future directions services and careers in the 21st century academic library

*Academic Capitalism* Richard Münch, 2014-04-16 This book investigates the intensifying struggle for excellence between universities in a globalized academic field The rise of the entrepreneurial university and academic capitalism are superimposing themselves on the competition of scientists for progress of knowledge and recognition by the scientific community The result is a sharpening institutional stratification of the field This stratification is produced and continuously reproduced by the intensified struggle for funds with the shrinking of block grants and the growing significance of competitive funding as well as the increasing impact of international and national rankings on academic research and teaching The increased allocation of funds on the basis of performance leads to overinvestment of resources at the small top and underinvestment for the broad mass of universities in the middle and lower ranks There is a curvilinear inverted u shaped relationship of investments and returns in terms of knowledge production Paradoxically the intrusion of the economic logic and measures of managerial controlling into the academic field imply increasing inefficiency in the allocation of resources to universities The top institutions suffer from overinvestment the rank and file institutions from underinvestment The economic inefficiency is accompanied by a shrinking potential for renewal and open knowledge evolution

*The Reference Interview Today* Dave Harmeyer, 2014-02-07 More an art than a science the reference interview requires not only knowing a specific set of skills but also how to apply those skills in an ever

changing world Good reference interviews accomplish three goals establishing contact with the user determining what the user's information need actually is and checking to make sure that the answer actually meets that need completely Built around timeless service principles including Ranganathan's Five Laws The Reference Interview Today Negotiating and Answering Questions Face to Face on the Phone and Virtually is a practical field guide to conducting reference interviews in every modality face to face phone chat text virtual world such as Second Life and even mashup reference interviews where multiple modalities are used to answer the question Following a concise presentation of reference interview basics the heart of the book is 12 different reference interview scenarios set in different modes and demonstrating a specific principle Each of these twelve follows a similar construction a general overview of the principle for example save the time of the reader a script of the reference interview and then learning questions designed to demonstrate the principle's as illustrated in the script Examples range from assisting faculty members with scholarly resources to helping a high school student with a paper to assisting a hairdresser with a reference question One scenario is based in the year 2025 to emphasize the timeless nature of reference service Seamlessly combining both time honored principles and multiple technologies this practical book demonstrates how librarians can be as relevant and necessary in the digital age as in the print world Appropriate for both novice and experienced librarians as well as for LIS students this concise handbook speaks to those working in or preparing for careers in public school academic and special libraries

**Science under siege** Peter Banks, Daniel Lunney, Chris Dickman, 2012-11-01 On Saturday 29 November 2008 the Royal Zoological Society of NSW held a forum with the theme of Science under siege As the RZS is a zoological society zoology under threat became the secondary theme and the basis for selecting speakers This book records that forum with the papers developed for this book as the written word from the spoken presentations Papers that were presented as posters are included as are the edited plenary sessions which featured questions from the floor with answers and comments encouraged from anyone in the forum We were delighted that Mark Horstman from ABC Catalyst was willing to replace his peripatetic colleague Paul Willis who was nonetheless very happy to write the foreword There is a place for such skilled science communicators we need more of them and scientists at the lab bench or in the field or exploring computer models or those that have now taken a job in the policy world need to stay in touch with them Some might say that the title Science under siege seems a bit extreme but we invite you to examine the evidence as presented in this book What follows is an edited version of the introductory material that advertised the forum The title looks dramatic but if you ask yourself is anything killing the science in your area of interest you might be surprised that you come up with a point or two Then ask a wider set of questions such as are there any pressures that preclude people from doing good zoology do either political budgetary constraints impact on your field is science in the media a subject that influences the outcome of your work are there economic impediments to careers in zoology is the education mix in Australia right for this new century are the best researchers becoming full time administrators or the converse the poor researchers

becoming the administrators can you place the Australian situation in an international context are there reduced opportunities for human interactions with the natural world is the virtual world killing reality and what are your predictions of the future To deal with such issues the Royal Zoological Society of NSW has structured the day to emphasize a range of themes beginning with identifying the issues including those that are persistent and those that are emerging and encompassing palpable hits to science Direct and indirect hits to science include such matters as the withdrawal of funding subversion of science death by 1000 cuts redirection of funding to fashion issues and using the name of science to justify things that are really not justifiable The name of science is being dragged down We need to confront the ever present problem of ignoring the scientifically accurate for the politically correct This raises such questions as to whether basic skills in biology are not being acquired because of public concern based on extreme animal rights propaganda Good science is not optional but what can be done if you are under siege The answers include understanding the philosophy of science the legal perspective and asking what scientists are or should be doing Audience participation will be a central part of this forum The plenary sessions will address questions raised by the speakers and the posters and debate issues and consider options for future directions It is widely known that it is hard to pull a major paper together on this theme but so many scientists know of at least one matter that they would like to draw to public attention So short contributions are included Listen to the speakers present some overarching themes or compelling case studies contribute to the debate on the day then examine your stance on a variety of these subjects to see whether the day changes your view of this often cryptic aspect of zoology As editors we wish to acknowledge the skills of the referees all papers were refereed by two peers and the patience of the authors for what has been a long gap between the date of the forum and this publication By the end of 2008 the Royal Zoological Society of NSW along with everyone else was caught by the GFC Global Financial Crisis and we simply had to extend the length of the queue for publication We also reassessed our mode of publication The Council of the Society voted to publish this production as an ebook as well as a short print run for formal library deposit and other essential matters The ebook is open access to enhance the reach of the papers and the ideas At the same time the Royal Zoological Society of NSW signed a contract for a more international mode of access of the publications of the Society and papers are now available via Metapress <http://rzsnsw.metapress.com> Science remains under siege in our view and now we have been alerted to the range of issues it becomes easier to spot the small irritating closing of options that collectively amount to a denial of science and its relegation to an optional way of looking at the world During production of this book this matter became obvious on a number of fronts which led us to invite the paper by Rosie Cooney and colleagues to defend their science of kangaroo conservation and commercial harvesting from an attack on the science We also saw that this issue of science under siege needs more airing and the Royal Zoological Society of NSW is planning its forum for the end of 2012 to take up another strand of this theme by capitalizing on the lifelong insights of scientists under the rubric of grumpy scientists an ecological conscience of a nation This idea in fact

derives directly from the suggestions in the plenary sessions by Nick Holmes and Charley Krebs We are also concerned for young scientists with science under siege manifesting often in a failure to create permanent careers for science graduates that advance science itself and zoology in particular from flourishing and identifying problems and finding solutions If we want to conserve the native fauna of Australia then Australian zoologists will have to be key team members We contend that to put science under siege and zoology under threat we not only further imperil our native wildlife but also the careers of the small band of specialists that can see the issues find the problems implement solutions and evaluate the outcomes In short science under siege is not a light matter and no one in this forum thought so Read on form an opinion and speak up and publish your thoughts your examples and your solutions Journal of Information Science ,2002 Principles practice *The Practical Guide to Clinical Research and Publication* Uzung Yoon,2021-08-03 The Practical Guide to Clinical Research and Publication provides a comprehensive overview of the key foundations of epidemiology statistics and epidemiological studies This book presents the most important terms and knowledge in the field from a medical point of view Sections contain numerous clinically oriented examples and drawings to facilitate understanding and clarify the relation to clinic and practice The book contains many graphics and key points for easier understanding and is written using bullet points for ease of use and comprehension It is ideal for physicians and clinical researchers who want to use it as guidance for clinical research or teaching Contains numerous clinically oriented examples and drawings Provides an explanation of epidemiology and statistics to aid understanding of clinical research Written by a physician with extensive knowledge in research

## Journals Impact Factor Search Introduction

In today's digital age, the availability of Journals Impact Factor Search books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Journals Impact Factor Search books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Journals Impact Factor Search books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Journals Impact Factor Search versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Journals Impact Factor Search books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Journals Impact Factor Search books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Journals Impact Factor Search books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Journals Impact Factor Search books and manuals for download

have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Journals Impact Factor Search books and manuals for download and embark on your journey of knowledge?
