It offers a comprehensive systemic research of intellectual property based on the most up to date legislation and cases of IP use in Russia. Such an approach will allow readers to fully understand the peculiarities of IP as a special phenomenon of the Russian market. There is a good balance between theoretical knowledge and practical implementation and the plain language and unique approach to structuring information make the book accessible and easy to understand. It contains a special glossary of terms to facilitate the understanding of the material presented in the book. Although the book looks specifically at the Russian case it will have international appeal since intellectual property by its very nature has become a transnational phenomenon. Moreover, the international regulatory framework provides for the similarity of legal regulation of IP.
