Pittaluga, Elena Seghezza, 2024-12-09 Contrary to existing economic analyses of the Weimar Republic this book looks beyond the explanations of the individual events that characterized it in particular hyperinflation Brüning's fiscal policy and the 1931 crisis Instead it adopts a more unified approach and thereby sheds light on the underlying causes of these events The book argues that these individual events were the final result of economic processes and policy choices which had made it possible to mitigate the social and political conflict that would otherwise have undermined the Republic's existence Specifically it postulates that hyperinflation was the result of the persistent inflation which had permitted Germany to maintain low unemployment meet unions wage demands and contain left wing radicalism Similarly the banking and currency crisis of 1931 was caused by a sudden stop related to the high level of foreign debt incurred by Germany after the Dawes Plan Debt which had however enabled the country to finance the persistent external deficits resulting from its high domestic demand and large public expenditure incurred in an attempt to avoid social conflict The book reviews the various models and approaches proposed highlighting their relative strengths and weakness and concludes by providing a unifying common thread which explains how the dramatic economic events which characterized the Weimar Republic were the result of the very economic

processes which had contributed to its temporary survival This book will appeal to students scholars economic researchers in general and more specifically to those interested in economic history monetary and financial economics economic policy political decision making and political economy in particular those seeking a better understanding of the Weimar Republic s economic history *The Spectator* ,1908 A weekly review of politics literature theology and art Cumulated Index Medicus ,1967 *Fusion Energy Update* ,1986 British Policy and European Reconstruction After the First World War Anne Orde,2002-04-18 This book is a study of the political economy of Europe after 1919 **Daily Report** ,1996

Trademark Protection and Freedom of Expression Wolfgang Sakulin,2011-01-01 Trademark law grants right holders an exclusive right to prevent third parties from using a sign This can readily be seen as the antithesis of freedom of expression which arguably includes a right of third parties to non exclusive use of a sign for a variety of purposes ranging from informing consumers to voicing criticism or to artistic expression Drawing on cultural theory and which has shown that society is involved in a constant struggle about shaping the meaning of signs including trademarks and this highly original and provocative book contends that trademark law fails to sufficiently differentiate between commercial purpose and the social political or cultural meanings carried by one and the same sign The author shows that the and functional approach and to justifying trademark rights taken in current jurisprudence and doctrine is deficient in that it does not take sufficient account of the fact that trademark rights can restrict the freedom of expression of third parties Specifically the exercise of rights granted under the European Trademark Regulation and the national trademark rights harmonized by the European Trademark Directive can cause a disproportionate impairment of the freedom of commercial and non commercial expression of third parties as protected by Article 10 of the European Convention on Human Rights ECHR The author and s in depth analysis explores such elements as the following o the economic and ethical rationales of trademark rights o whether trademark rights under European law can be justified by these rationales o how freedom of expression can serve as a limitation to trademark rights o what level of protection such freedom of expression grants to third parties o the role of trademarks of social cultural or political importance in public discourse o chilling effects on public discourse that can be caused by the exercise of trademark rights o the interpretation of provisions regulating the grant and revocation of trademark rights in light of freedom of expression and o the interpretation of the scope of protection and the limitations of trademark rights in light of freedom of expression In effect the analysis serves to expand the focus of legislators courts and trademark registering authorities from the interests of trademark right holders who seemingly are granted ever more protection to the justified interests of third parties The critical analysis of existing trademark law leads the author to clearly identify the areas of trademark law in which the law needs to be reinterpreted and the areas in which legislative action should be taken with recommendations for a number of limitations that should aid legislators in drafting concrete amendments The new insights and imperatives provided by this book are sure to prove useful to both courts interpreting

existing provisions of trademark laws and to legislators who are faced with the challenges of drafting new rules or revising existing laws

The Oxford Companion to the Economics of China Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2014-10-30 China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate. How did the country do it? How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades? What does the detailed pattern of China's success and challenges look like at the sub-sectoral and sub-national levels and what does this mean for future policy? How will China's role as a global economic player evolve? The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past, present and future. 99 entries written by the leading China analysts of our time. The topics covered include the China model, future prospects for China, China and the global economy, trade and the Chinese economy, macroeconomics and finance, urbanisation, industry and markets, agriculture and rural development, land, infrastructure and environment, population and labour, dimensions of wellbeing and inequality, health and education, gender equity, regional divergence in China and a selection of perspectives on some of China's provinces. The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions: Director General, International Food Policy Research Institute; Co-Editor, China Economic Review; President, Chinese Economists Society; Assistant Director of Research at the IMF; Principal Adviser to the Chief Economist of the World Bank and Professors of Economics at Ivy League Universities.

Daily Report, West Europe, 1996 **Air University Library Index to Military Periodicals**, 1995 The Hindu Index, 2006 Index to Indian Economic Journals, 1975 American Bankers Association Banking Literature Index, 1990

Bell & Howell Newspaper Index to the Times-picayune, the States-item, 1984 **Regulating the Polluters** Alexander Ovodenko, 2017 Why have national governments created different international rules and institutions to address global environmental issues? Alexander Ovodenko argues that this variation can be explained by looking to a dynamic that has been thus far downplayed by the literature on global environmental governance: the structures of industries regulated by environmental rules. *Regulating the Polluters* inverts the literature on regulatory capture and collective action by presenting empirical evidence of the irony of market power in global environmental politics.
