The New Collective Bargaining Gary Chaison,2012-06-12 This book explains how collective bargaining has changed in important and lasting ways over the past decade We are now seeing a new and powerful strain of the concession bargaining that traces its roots back to the early

1980s The collective bargaining of the past decade can be characterized as ultra concession bargaining because it is an intense and self perpetuating deviation from earlier concession bargaining Employers now act and unions react rather than the other way around Employers no longer have to establish a credible case of financial hardship or commit to the traditional quid pro quo of saving jobs in return for lower labor costs or guarantee singularity that concession bargaining is a single even that will not have to be repeated Not all collective bargaining occurs as this extreme variant but it has become the prevailing form Essentially there has been a sea change in collective bargaining in America The book describes the transformation of collective bargaining in a lively and readable manner avoiding academic legalistic or technical jargon and it will appeal to persons interested in the future directions of collective bargaining and unionism in America e g the general public graduate and undergraduate students in human resource management and industrial relations courses and labor relations managers and union activists and staff The book deals with aspects of union revival as it asks whether ultra concession bargaining is cause or outcome of the unions declining influence in the American economy and society Above all by using published reports on bargaining and interviews and surveys of bargaining settlements the book shows where the concession bargaining is now and where it is heading Education at a Glance 2012 OECD Indicators OECD,2012-09-11 Education at a Glance OECD Indicators is the authoritative source for accurate and relevant information on the state of education around the world It provides data on the structure finances and performance of education systems in OECD member countries as well as in selected non member countries *Climate Change and Global Policy Regimes* Timothy Cadman,2013-03-25 An analysis of the global climate talks and the key human systems threatened by increased greenhouse gas emissions including health refugee management energy production carbon markets and local government *Linear and Nonlinear Semiconductor Optical Amplifiers for Next-Generation Optical Networks* René Bonk,2014-05-12 In this book semiconductor optical amplifiers SOAs are studied with a view to linear and nonlinear applications in next generation optical networks Quantum dot SOAs can be optimized for linear amplification of signals with different modulation formats and multiplexing techniques Conversely bulk SOAs can be easily optimized for operation in the nonlinear regime However due to the fast carrier recovery times in QD SOAs we also look into nonlinear applications with these devices *Youth Sport, Physical Activity and Play* Andrew Parker,Don Vinson,2013-06-26 Sport physical activity and play are key constituents of social life impacting such diverse fields as healthcare education and criminal justice Over the past decade governments around the world have begun to place physical activity at the heart of social policy providing increased opportunities for participation for young people This groundbreaking text explores the various ways in which young people experience sport physical activity and play as part of their everyday lives and the interventions and outcomes that shape and define those experiences The book covers a range of different sporting and physical activities across an array of social contexts providing insight into the way in which sport physical activity and play are interpreted by young people and how these interpretations

relate to broader policy objectives set by governments sporting organisations and other NGOs In the process it attempts to answer a series of key questions including How has sport policy developed over the last decade How do such policy developments reflect changes at the broader political level How have young people experienced these changes in and through their sporting lives By firmly locating sport physical activity and play within the context of recent policy developments and exploring the moral and ethical dimensions of sports participation the book fills a significant gap in the sport studies literature It is an important reference for students and scholars from a wide range of sub disciplines including sports pedagogy sports development sport and leisure management sports coaching physical education play and playwork and health studies Neoliberalism and Imperialism: Dissecting the Dynamics of Global Oppression Tatah

Mentan,2016-08-06 Today's neoliberal imperialism crushes all unfavourable conditions through multiple forms of oppression to ensure the creation of a world in its own image The systemic and structural oppression birthed by neoliberal imperialism once again reproduces and implements colonialism armed robbery on a global scale The difference between the old form and the new form is the scale of destruction and the overt use of Weapons of Mass Destruction Hence the militarization of the globe is a natural outcome In this book Professor Tatah Mentan argues that United Fruit Company for instance could not have flourished without the strong support of the Marines the U S State Department and all of its resources In fact the French the German the British and the Belgian financiers could not have been able to suck the blood out of their colonies without their legionnaires soldiers mercenaries preachers merchants and generals Specifically the Western colonial empires in the nineteenth century presented their penetration pillage and rape of Africa Asia and Latin America as modernization and tutelage aided by the ideology of survival of the fittest This conceit pervaded the entire Western bourgeois social science educational and religious institutions And today there is the same clear symbiotic relationship between business and the military Empirical realities demonstrate that companies like Microsoft could not enjoy its overwhelming prosperity without having the strong military that America has This is precisely why neoliberal imperialism operates alongside oppressive militarism war and dictatorship and must be disrupted to liberate mankind from its death grip Kernel Methods and Hybrid Evolutionary Algorithms in Energy Forecasting Wei-Chiang Hong,2018-10-22 This book is a printed edition of the Special Issue Kernel Methods and Hybrid Evolutionary Algorithms in Energy Forecasting that was published in Energies

Intellectual Property and Biodiversity Michelangelo Temmerman, 2011-12-12 Biotechnology is at the heart of heated debates about ethics safety economic development and about the control over the biological materials and technologies used The latter grossly called biodiversity issues relating to the application of intellectual property has been the subject of a wealth of literature Yet the situation of animal genetic resources specifically has only marginally been addressed so far Many books and articles address biotechnology and agriculture but have only plants and seeds in mind Case law and specific regulation is equally scarce Exacerbated by the so called erosion of animal genetic resources climate change the globalization of the market place and a strong concentration of markets animal genetic resources however demand specific analysis and adjustments in intellectual property law The decoupling of rights over animal genetic resources as an abstract concept from those over the concrete animals is a fact today The application of patents in this context became a full fledged part of the management of animal genetic resources This monograph analyzes against this background the impact of the patent system on ownership traditions in agriculture on animal welfare and on biodiversity It looks at how those factors in turn are likely to affect the shape of patent law and how they should affect it The author hereby focuses on important specific issues arising including the following the underlying elements deciding on the shape of regulation innovation economic development agriculture human rights animal welfare the conservation of resources and equal trading conditions the continuing applicability of trademarks geographical indications copyright and trade secrets patentability rules and exclusions

the extension of patent rights over progeny the meaning of essentially biotechnological processes the legal definitions of morality and ordre public in the context of animal welfare and the future of international patent law in the context of global governance theories With detailed investigation of how three major jurisdictions the European Union the United States and Canada have regulated the matter the book highlights unresolved issues in the laws dealing with animal genetic resources How do the usual principles of patent law affect ownership over animals in agriculture To what extent is patent law in accordance with neighbouring fields of regulation with relation to animal welfare How can intellectual property be used to alter stimulate or tackle developments in the realm of the conservation and promotion of biodiversity Questions like these are asked checked upon the more technical country studies and then used to put to test the adequacy of international patent regulation in a final chapter As a deeply informed overview of the arguments and discussion points this is the only book of its kind It links general discussions to the often technical and complicated patent regulations in the specific context of animal genetic resources It is sure to bring lawyers in the field closer to the policy debates and decision makers closer to the precise idiosyncrasies of patent law
