major analytical points of the book revolve around the intricate triangular relationships among China's politics, financial market rules and the financial markets themselves. The authors argue that relying solely on any existing school of thoughts is insufficient for comprehending the complexities of China's financial landscape. Instead, the book explores the multifaceted connections between politics, courts and the financial markets. It delves into how political forces drive the formulation, development and enforcement of financial market rules, including the roles played by various government bodies and the legal system. Unlike a focus on regulations and rules merely on paper, the book takes a grounded approach by investigating China's financial markets rules in practical terms. By doing so, it seeks to discover the underlying logic behind the unique features of China's financial system, providing a nuanced understanding of the interactions between political forces, legal frameworks and the financial markets in the Chinese context.

Inequality Studies from the Global South David Francis, Imraan Valodia, Edward Webster, 2020-05-04. This book offers an innovative interdisciplinary approach to thinking about inequality and to understanding how inequality is produced and reproduced in the global South. Without the safety net of the various Northern welfare states, inequality in the global South is not merely a socio-economic problem but an existential threat to the social contract that underpins the democratic state and society itself. Only a response that is firmly grounded in the context of the global South can hope to address this problem. This collection brings together scholars from across the globe with a particular focus on the global South to address broad thematic areas such as the conceptual and methodological challenges of measuring inequality, the political economy of inequality in the global South, inequality in work, households and the labour market and inequalities in land, spaces and cities. The book concludes by suggesting alternatives for addressing inequality in the global South and around the world. The pioneering ideas and theories put forward by this volume make it essential reading for students and researchers of global inequality across the fields of sociology, economics, law, politics, global studies and development studies.
