*Banks, Exchanges, and Regulators* Ranald C. Michie, 2020-11-26 Never have financial markets been subjected to a period of change as rapid and extensive as took place from the 1970s onwards In the 1970s global financial markets were controlled by governments compartmentalized along national boundaries and segregated according to the particular activities they engaged in This all disintegrated in the decades that followed under the pressure of market forces global integration and a revolution in the technology of trading

One product of this transformation was the Global Financial Crisis of 2008 which exposed the fragility of the new structures created and cast a long shadow that we still live in today. The response to that crisis has shaped the global financial system which has been tested once again by the coronavirus pandemic. However, none of the outcomes of this transformation were inevitable despite the forces at work. They were the product of decisions taken at the time for a multitude of reasons. Banks, exchanges and regulators were faced with unprecedented challenges and opportunities as a revolution swept away traditional ways of conducting banking, the methods used to trade in financial markets and the rules and regulations employed to enforce discipline. In this book, Randal C. Michie provides an authoritative and unrivalled account of this upheaval based on a careful and exhaustive reading of the Financial Times over the last four decades, using it to provide a source of material unmatched by any other in terms of depth and coverage. By studying what happened and why in real time, it is possible to explain the decisions taken that shaped the course of the transformation and its repercussions.

House of Commons - Communities and Local Government Committee: Community Budgets - HC 163 Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2013-10-23. Community Budgets are demonstrating their potential to deliver cheaper, more integrated and more effective public services. They are at risk, however, of being replaced after a few years if key issues are not resolved. If this opportunity is missed, the Committee warns that local services could come under unsustainable pressure in the face of increased demand and reduced budgets. This in turn may result in more spending later on judicial and emergency health and welfare interventions. The Government should send a clear message that it will assist every local authority wishing to introduce Community Budgets and to set out the specific assistance it will provide them with. Furthermore, the programme of pilots must not be allowed to slow progress towards wider implementation. If they are to succeed, public service providers and local authorities must realise investment in Community Budgets will bring them benefits. Local authorities, their partners and central government should therefore develop a framework for agreements on how the benefits of investment are to be shared. On the Troubled Families Programme, the Committee is supportive of the work being done but highlights the need for greater focus on how work with these families will continue after the programme ends in 2016. Noting that the resources available have not increased in proportion to the number of families added to the programme in June, DCLG needs to monitor carefully progress and provide more resources to local authorities if necessary.

whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology
