

State whether each relationship can be modeled with a linear function or an exponential function and justify your choice. Note: You do not need to write the function

1. The relationship between the distance driven and the charge when a taxi driver charges \$2.50 for the first mile and \$1.50 for each additional mile.

Linear because it goes up \$1.50 every additional mile.

2. The relationship between the number of bacteria and time when a culture of 6000 bacteria is reduced by 50% every 4 hours.

Exponential because its being reduced by a different amount.

3. The relationship between the volume of a landfill and time when the volume doubles every three years.

Exponential because every year it will be doubled differently.

4. The relationship between the altitude of a hot air balloon and time when the hot air balloon takes off at 5500 feet above sea level and rises 120 feet every minute.

Linear because it goes up 120 feet every minute.
