

5 Points of Darwin's Natural Selection

Read the following situations below and identify the 5 points of Darwin's natural selection.

1) There are 2 types of worms: worms that eat at night (nocturnal) and worms that eat during the day (diurnal). The birds eat during the day and seem to be eating **ONLY** the diurnal worms. The nocturnal worms are in their burrows during this time. Each spring when the worms reproduce, they have about 500 babies but only 100 of these 500 ever become old enough to reproduce.

a. What worm has natural selection selected AGAINST? diurnal worms FOR? nocturnal worms

b. Darwin's 5 points: Identify the 5 points in the scenario above.

Population has variations. There are 2 types of worms in the area (diurnal and nocturnal)

Some variations are favorable. Birds do not eat nocturnal worms (nocturnal worms advantage)

More offspring are produced than survive. 100 of the original 500 worms survive to reproduce

Those that survive have favorable traits. More nocturnal worms survive and reproduce

A population will change over time. Nocturnal worm population increases; diurnal worm population decreases

2) There are 3 types of polar bears: ones with thick coats, ones with thin coats and ones with medium coats. It is fall, soon to be winter. The temperatures are dropping rapidly and the bears must be kept warm, or they will freeze to death. Many of the bears have had 2 cubs each but due to the extreme temperatures, many mothers only have one cub left.

a. What bear will natural selection select AGAINST? thin coats FOR? thick coats

b. Darwin's 5 points: Identify the 5 points in the scenario above.

Population has variations. There are 3 types of bears (thick, medium, and thin)

Life Science (Teacher Guide) Dr. Carl Werner, 2018-05-17 Chapter Discussion Question Teachers are encouraged to participate with the student as they complete the discussion questions The purpose of the Chapter Purpose section is to introduce the chapter to the student The Discussion Questions are meant to be thought provoking The student may not know the answers but should answer with their thoughts ideas and knowledge of the subject using sound reasoning and logic They should study the answers and compare them with their own thoughts We recommend the teacher discuss the questions the student s answers and the correct answers with the student This section should not be used for grading purposes DVD Each DVD is watched in its entirety to familiarize the student with each book in the course They will watch it again as a summary as they complete each book Students may also use the DVD for review as needed as they complete each chapter of the course Chapter Worksheets The worksheets are foundational to helping the student learn the material and come to a deeper understanding of the concepts presented Often the student will compare what we should find in the fossil record and in living creatures if evolution were true with what we actually find This comparison clearly shows evolution is an empty theory simply based on the evidence God s Word can be trusted and displayed both in the fossil record and in living creatures Tests and Exams There is a test for each chapter sectional exams and a comprehensive final exam for each book

Robustness and Evolvability in Living Systems Andreas Wagner, 2013-10-24 All living things are remarkably complex yet their DNA is unstable undergoing countless random mutations over generations Despite this instability most animals do not grow two heads or die plants continue to thrive and bacteria continue to divide Robustness and Evolvability in Living Systems tackles this perplexing paradox The book explores why genetic changes do not cause organisms to fail catastrophically and how evolution shapes organisms robustness Andreas Wagner looks at this problem from the ground up starting with the alphabet of DNA the genetic code RNA and protein molecules moving on to genetic networks and embryonic development and working his way up to whole organisms He then develops an evolutionary explanation for robustness Wagner shows how evolution by natural selection preferentially finds and favors robust solutions to the problems organisms face in surviving and reproducing Such robustness he argues also enhances the potential for future evolutionary innovation Wagner also argues that robustness has less to do with organisms having plenty of spare parts the redundancy theory that has been popular and more to do with the reality that mutations can change organisms in ways that do not substantively affect their fitness Unparalleled in its field this book offers the most detailed analysis available of all facets of robustness within organisms It will appeal not only to biologists but also to engineers interested in the design of robust systems and to social scientists concerned with robustness in human communities and populations

Basic Pre-Med Parent Lesson Plan, 2013-08-01 *Basic Pre Med Course Description* This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Microbiology As the world waits in fear world health organizations race to develop a vaccine for the looming bird flu epidemic a threat that has forced international federal and local governments to begin planning for a possible pandemic and the widespread death and devastation which would follow Will the world find an answer in time Or will we see this threat ravage populations as others have before in 1918 with influenza in the late 18th century with yellow fever or the horrific black death or bubonic plague in 1347 AD Are these viruses examples of evolution

Did God make microbes by mistake Are they accidents of evolution out of the primordial soup These timely questions are examined throughout The Genesis of Germs It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from and how do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man s sin and the hope we have in the coming of Jesus Christ Semester 2 Life Science Study clear biological answers for how science and Scripture fit together to honor the Creator Have you ever wondered about such captivating topics as genetics the roll of natural selection embryonic development or DNA and the magnificent origins of life Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process
