Nebraska Standards for Mathematics: SS12.1.1b; 12.1.3b; 12.1.3c; 12.3.3b; DK1-3

Common Core Standards for Mathematics: A.SSE.2

Objective: Students will understand how to simplify exponential expressions.

Students will know to add the exponents when multiplying like bases.

— subtract the exponents when dividing like bases

Students will be able to use the multiplication and division properties of exponents to simplify an expression.

Overview

Students will use [desmos.com](https://www.desmos.com) (or any graphing calculator) to explore the multiplication and division properties of exponents, specifically $a^m \cdot a^n = a^{m+n}$ and $\frac{a^m}{a^n} = a^{m-n}$. The exploration begins with making observations of odd power and even power functions as well as with a review of recognizing when two graphs are the same. Students will then graph given expressions where like bases are multiplied or divided. Based on the shape of the graph, students can determine if the expression is even or odd. By graphing the originally provided even/odd expressions at the beginning, students will determine the simplest form of each expression by looking for overlap in the graphs. By looking for a pattern in the exponents, students will be able to generalize the multiplication and division properties.

Prior Knowledge

- Definition of Exponents
- Identity Property of Exponents
- Zero Exponent Property
- Negative Exponent Property
- Working Knowledge of Desmos. Particularly, how to enter functions and zoom. Being able to turn functions on/off may be helpful, but not required.
- Be able to graphically recognize two functions are the same when they completely overlap one another, giving the appearance of only one line on the graph.

$$\text{e.g. } a^3 = a \cdot a \cdot a$$

$$a^1 = a$$

$$a^0 = 1$$

$$a^{-n} = \frac{1}{a^n} \text{ and } \frac{1}{a^{-n}} = a^n$$

Assessment

- Monitor and check that students are filling in the properties correctly.
 - Engage with students during work/explore time to explain how they came to their conclusion(s).
- Practice problems on bottom of student handout.
 - Check while circulating, looking for incorrect answers to find and flush out misconceptions.
 - Did they change their bases?
 - Did they combine their exponents properly?
 - If necessary, direct them back to the exploration and learn how they completed the activity.
- Class discussion at conclusion of period, or following day.
- Quiz over exponent properties (about 4 days after)

Materials

- Student handout for each student (attached)
- Access to [desmos.com](https://www.desmos.com) for each student, or pairs of students if necessary.
Desmos is available online, [desmos.com](https://www.desmos.com), and as a free mobile app for Android and Apple devices.
