Managing Custom Code In Sap:

Managing Custom Code in SAP Tony De Thomasis, Alisdair Templeton, 2013 *Building a Resilient SAP Enterprise*

Soulat Khan, Sunny Patwari, Ganesh Suryanarayanan, 2025-06-18 SAP's transformation from on-premises solutions to cloud first offerings represents a paradigm shift for enterprise architecture. RISE and GROW with SAP are redefining how organizations deploy, customize, and extend SAP applications in the cloud era, creating opportunities for innovation alongside new architectural challenges. This book navigates contemporary SAP solutions, ensuring that an enterprise remains robust and future-ready. This book takes you through modern SAP development from clean core methodology and essential skill modernization for SAP developers and architects alongside SAP's latest cloud deployment models like RISE and GROW. You will explore the entire SAP Development Platform, including SAP BTP Build tools and generative AI integration. The book then explores designing resilient SAP applications using low code and no code approaches, cloud extensibility with Steampunk and Embedded Steampunk, and ABAP cloud development with SAP APIs and ADT. Crucially, it also covers vital aspects of application security and cost management. By the end of this book, you will be equipped to architect resilient SAP solutions that leverage the combined power of SAP BTP and hyperscaler services, ensuring your enterprise can innovate rapidly while maintaining security, performance, and operational excellence in an increasingly complex cloud landscape.

WHAT YOU WILL LEARN

- Implement clean core methodology to maximize SAP upgrade efficiency.
- Navigate the RISE and GROW licensing models and technical implications.
- Integrate SAP BTP with hyperscaler services for scalable solutions.
- Leverage generative AI to enhance SAP business processes.
- Apply well-architected principles to SAP BTP applications.
- Manage security and costs across hybrid SAP landscapes.
- Design highly available, resilient SAP applications with low code/no code.

WHO THIS BOOK IS FOR

This book is designed for SAP architects, developers, and technical leaders responsible for enterprise SAP transformation. It is ideal for professionals seeking to evolve from traditional ABAP development to modern, cloud-native SAP implementation strategies.

Tobias Thiel,2007-04-02 Inhaltsangabe Abstract In today s companies changes happen very fast On the one hand more and more new technologies are arising on the other hand business processes have to change because of mergers and acquisitions new regularities changing customer requirements and so forth As business processes are supported by information technology information technology has to cope with both types of changes From a business perspective on demand adaptation of information technology to business is required Service oriented architecture SOA is currently discussed as an opportunity to better adapt to those changes According to Gartner s hype cycle for emerging technologies SOA already crossed the peak and is now in the trough of disillusionment But SOA is far from being unfashionable as it would be expected during this phase There is still high media coverage and a lot of SOA books have been published recently or will be published during the next months What is true however is that the expectations are getting more realistic and people start to think about the real benefits This is probably due to the fact that companies experienced that implementing an SOA is not as fast and easy as the marketing hype might have given the impression Although the hype surrounding SOA is immense the concept

is still in its early childhood with regards to concrete implementations According to a survey conducted by Experton Group only three percent of 110 German enterprises all with over 100 Employees have a SOA based solution in place Besides high costs expected from migration to SOA the lack of SOA know how is identified as a main reason As the survey reveals 45 percent of the interviewed enterprises have nearly no knowledge or no knowledge about SOA at all Another 38 percent have only basic knowledge The lack of knowledge is confirmed by a survey from the research company Quocirca which found out based on a sample size of 1500 that 30 percent of respondents have absolutely no knowledge about SOA and 25 percent have only minimal knowledge Similar results are found among enterprises using SAP software The results of an online survey conducted by the German speaking SAP User Group DSAG shows that 64 percent of 344 enterprises are just a little or not at all familiar with enterprise SOA and only every fifth enterprise has developed a platform strategy Furthermore enterprise SOA is still a topic of the IT department although it would be

India Automated: How the Fourth Industrial Revolution is Transforming India Pranjal Sharma, 2019-11-07 Rethinking the future of India through automation From scavenging to lunar missions from railway factories to healthcare and even tax planning automation is growing faster and deeper in India than is visible In a country where more than a million people get ready for jobs every month this rise in automation can appear as an unwelcome change or a threat to their livelihood But the reality is that automation is enhancing efficiency accuracy and accountability of India's working professionals in ways that haven't been seen before Automation is helping generate information in a data poor country It is making India's private sector more active and government's functioning more transparent and reliable Through several case studies of private enterprises and government departments India Automated chronicles the transformation that India is undergoing and how robotics and process automation are infusing proficiency in our work and personal lives Automation is turning to be one of the most impactful results of the Fourth Industrial Revolution technologies in India AI drones blockchain cybersecurity 3D printing augmented and virtual reality include automated processes These are also opening new categories of employment for job seekers This book argues for deeper collaboration between industrial and government sectors to ensure that automation enhances India's steady growth while also mitigating its negative impact With this forward looking approach Pranjal Sharma brings us face to face with the reality that it is imperative for India to align itself with this revolution
