Ramamurthy, 2023-03-09 Pesticides Human Health Environmental Impacts and Management considers microbial degradation and environmental management of pesticides covers microbial options as an alternative to chemical pesticides explores plant microbe interactions for reduced applications of pesticides in the agricultural fields discusses the enhancement of microbial pesticides degradation explains function of engineered microorganisms for effective pesticide degradation describes potential indigenous effective microbes for effective pesticide degradation processes and presents research on microbes for sustainable agricultural and environmental practices Provides the latest developments and progress on pesticide management through sustainable practices Describes the adverse effects of pesticides on human health and its precautionary control measures through biological agents Introduces the aspects and advances of biological technologies in the environment for sustainable management of pesticides Elaborates on advanced prospective vide application and modern practices of harnessing the potential of microbial resources in environment *Mitochondria and*

Longevity, 2018-07-31 Mitochondria and Longevity Volume 340 the latest release in the International Review of Cell and Molecular Biology series reviews and details current advances in cell and molecular biology The IRCMB series has a worldwide readership maintaining a high standard by publishing invited articles on important and timely topics with this release focusing on topics such as Mitochondria metabolism and aging Mitohormesis Mitochondrial dynamics in the aging stem cell compartment Mitochondrial proteostasis and aging Mitochondrial DNA mutations and aging Mitochondrial sirtuins NAD NADH and aging Mitophagy and aging Mitochondria calcium transport and aging Publishes only invited review articles on selected topics in cell and molecular biology Authored by established and active cell and molecular biologists Drawn from international sources Offers a wide range of perspectives on specific subjects Recent advancements in microbe-pesticide interaction: A smart-soil bioremediation approach, 2nd edition Pankaj Bhatt, Shaohua Chen, Cormac Murphy, 2024-06-19 The increasing use and the continuous development of pesticides are required to maintain sufficient global food production The pesticide residues and their biotic and abiotic breakdown products may be harmful to the environment and may leach into waterways thus it is crucial that the interactions of pesticides with microorganisms are deeply understood at all levels Pesticides reach the soil via direct and indirect routes The fate of the pesticides in the soil is affected by chemical physical and microbiological factors Microbial degradation of pesticides in soil is possible owing to the diverse metabolic capabilities of the microorganisms present thus indigenous microbes act as biocatalysts for the remediation of the pesticides from the environment The research topic will cover novel insights into microbial pesticide degradation with specific attention to the microbe pesticide interactions in soil To date researchers have focused on the degradation of pesticides using indigenous microbes with different degradation rate There is scant information about the degradation intermediates metabolic pathways enzymes and complete set of factors involved into the microbes inhabiting into the pesticides contaminated soil Therefore this Research Topic aims to contribute to the understanding of the role of microbes in pesticide degradation in soil Since pesticide exposure may result in stress responses in the microbial population of the soil there is also a need to know about the impact of pesticides on the microbial cell structure membrane transporters cellular content metabolic pathways and gene expression We are interested in reports of novel metabolic pathways expression of the key genes in response to pesticide exposure and the changes in microbial physiology caused by pesticide exposure The removal of the pesticides from the soil requires smart microbial methods that can reduce the pesticides concentration in a short time The development of the smart bioremediation methods includes the direct application of the potential screened microbial strains and their enzymes The immobilized microbial strains and their enzymes can be used for the rapid removal of the toxic pesticides from the soil environment In addition engineering of the microbial consortia can be developed as the potential smart bioremediation tool Papers on single isolates or microbial communities are welcome as are reports of novel genes enzymes or metabolites that might be used as markers of soil contamination We would especially welcome manuscripts describing the application and

development of smart soil bioremediation approaches that could be beneficial for the treatment of large scale contaminated agricultural and industrial soils The research topic is of immediate interest to scientists and policy makers and Frontiers in Microbiology is an ideal forum for a collection of novel high impact reports The following themes are welcomes but not limited to Novel advancements into the microbe pesticide interactions to clean the pesticide contaminated soil High throughput screening of the potential bacterial fungi and algae strains for the removal of pesticides from the contaminated soil Smart soil bioremediation using indigenous microbial cultures and their purified enzymes Microbial enzymes a smart tool for bioremediation of the soil Engineering of the microbial consortia for the complete pesticides removal and resource recovery
