Olof Steinthorsdottir,Helen J. Forgasz,Joanne Rossi Becker,Kyeonghwa Lee,2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts

*The Constitution in the Classroom* Stu Woolman,Brahm Fleisch,2009 About the publication The law on education and educational practices in South Africa would exhaust the capacity of any meaningful monograph Instead the authors of this book engage six discrete topics that reflect the broader currents and conflicts in South African education debates a school choice b school fees c the right to an adequate basic education d single medium public schools e school governing bodies and f independent schools The book has two further aims First To move beyond the debates taking place separately in the education policy community and the legal academy and to demonstrate how these disciplines working in concert with each other can advance our understanding of law and education in South Africa Second To show that the ANC s complex education agenda must mirror the egalitarian utilitarian democratic and communitarian commitments found within the Constitution How these competing political claims reflected in our basic law play themselves out in the enabling education legislation the case law and government education policy frames each topic assayed in this work About the editor Stu Woolman is the Academic Director at the South Africa Institute for Advanced Constitutional Public Human Rights and International Law Brahm Fleisch is Associate Professor in the Division of Education Leadership and Policy Studies in Wits School of Education

developed Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education     The Language Issue in the Teaching of Mathematics in South Africa Lindiwe Tshuma,2021-01-26 The book is the result of a five year project that culminated within the first three years in doctoral research interrogating language competency for meaningful mathematics instruction at upper primary level conducted at University of Stellenbosch in 2017 and this book in the succeeding two years The initial research project received countrywide coverage in several South African media outlets including Times Live and Radio 2000

**Reporting on migrants and refugees** UNESCO,2021-06-19     **South African Schooling: The Enigma of Inequality** Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI     The Greenwood Encyclopedia of Children's Issues Worldwide Irving Epstein,2007-12-30 From the skyrocketing AIDS rate in Haiti to the oppressive pollution in industrial China from the violent street culture of Nigeria to the crippling poverty in Nicaragua from child trafficking in

Thailand to child marriages in India this jam packed six volume set explores all these issues and more in an unprecedented look at the world's children at the dawn of the 21st century In recent years while many countries have enjoyed a higher standard of living and improved working conditions others have been torn apart by war and incapacitated by famine and are struggling to improve life for their children and their future Recent concern over the world's children has resulted in a global attempt to define what constitutes an acceptable childhood New attention has been paid not only to healthcare and secondary education but also to the right to play and increased access to technology The UN's codification of children's rights has done much to expand our understanding of what is needed for healthy growth and development of children and youth Organized by region The Greenwood Encyclopedia of Children's Issues Worldwide is the first globally focused set of this magnitude offering extensive up to date coverage of these critical issues Original chapters accessibly synthesize current data on key topics including education play and recreation child labor family health laws and legal status religious life abuse and neglect and growing up in the 21st century
