**The Fixers** Lindsay Palmer, 2019-07-01

News fixers are locally based media employees who serve as translators coordinators and guides to foreign journalists in unfamiliar terrain Operating in the shadows fixers contributions to journalism are largely hidden from us yet they underpin the entire international news industry almost every international news story we read today could not be produced without a fixer Indeed without fixers on the ground skill and intimate knowledge of a territory journalists would struggle to document stories unfolding in countries outside their own Despite this however fixers remain one of the most under protected and undervalued groups contributing to the production of news Targeted by militant groups and governments even by their neighbors they must often engage in a precarious balancing act bridging the divides between foreign journalists and the people who live and work in fixers own communities In this book Lindsay Palmer reveals the lives and struggle of those performing some of the most important work in international news Drawing on interviews with 75 fixers around the world Palmer is the first researcher to illuminate fixers own rich narratives offering a glimpse of how difficult it is to play the role of cultural mediator both in and out of conflict zones A news fixer is not simply administrative rather the fixer's engagement with the story is editorial and more importantly cultural Each task that a fixer takes on is a creative effort at mediating between different lived experiences of race ethnicity gender sexuality religion politics community

and nation Ultimately The Fixers offers a different picture of international reporting than most people are accustomed to seeing one that is more collaborative more contested and more fluid in its understanding of truth in a global cross cultural context *Subject Guide to Books in Print* ,1996 Autodesk Maya 2015 Basics Guide Kelly L. **Substance of the Ancient Maya** Andrew K. Scherer, Thomas G. Garrison, 2024-12-01 Substance of the Ancient Maya Kingdoms and Communities Objects and Beings collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology epigraphy and art history The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya from hand held objects to entire kingdoms This dichotomy reflects the breadth of questions central to current research on the Maya It also illustrates how certain themes such as the relationship between the living and the realm of the supernatural are fundamental to both thinking by and about the Maya at all scales A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book illustrating that archaeologists epigraphers geographers and art historians can equally contribute to the substance of kingdoms and communities as they can to objects and beings Collectively these contributions show how the objects and beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors A final chapter by Stephen Houston reflects on unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past
