CLA Guide

© 2023 high5cameras.com - All rights reserved

This guide covers CLA of the Minolta SRT101. The guide can be used for most cameras in the SRT family as they all share the same basic mechanical body. While some of the later models added extra features the basic mechanics are identical. Some later models have additional features or features deleted which is natural given the cameras very long production life. Some of these are covered in the Appendices at the end of this guide.

The SRT is not overly complex to work on but you will require some specific tools in order to manage the CLA process. A list of tools is given in the introduction section of the guide. The Guide will be updated over time with additional sections to cover more detailed work.

Special thanks should go to Eugene Pate of Learn Camera Repair whose work on his own CLA guide was foundational for this guide and whose help and assistance in creating this guide has been essential. Thanks also to the very many people on the Learn Camera Repair Facebook group for their support and encouragement over the years notably James Holman, Frank Marshman and Don Perry but also all the people who have lent support and encouragement in my humble efforts.

While I have tried to cover all of the essentials in this guide it is recommended that you also acquire the SRT Super Service Manual and/or other SRT Service Manuals suited to your particular model as an accompaniment to this guide for more detailed technical information.

It is assumed at the start of the guide that the camera functions in a broadly operable way. E.g. the light meter is responsive and that the camera winds and fires.

No liability is accepted as to the accuracy of the guide or problems arising from using it.
