You return to the previous mode 5 seconds after removing your finger pads from the MIO sensors.

TROUBLESHOOTING POINTERS

1. If you don't get your heart rate within 30 seconds, motion finger pads and try again. It helps to wear your MIO for a little while to allow a layer of moisture to build up between the back of the watch and your arm. Do not press too hard on sensors.
2. If MIO's calculations start to vary significantly from what you have come to expect, if the digits freeze or if the face is blank, replace MIO's battery (see Section K).
3. To optimize readings, occasionally clean the back of your MIO case and the metal UPPER and LOWER MIO sensors with a clean soft cloth.
