academics research scholars senior graduate students government and public healthcare professionals **Federated Learning and AI for Healthcare 5.0** Hassan, Ahdi, Prasad, Vivek Kumar, Bhattacharya, Pronaya, Dutta, Pushan, Damañevius, Robertas, 2023-12-18 The Healthcare sector is evolving with Healthcare 5.0 promising better patient care and efficiency. However, challenges like data security and analysis arise due to increased digitization. Federated Learning and AI for Healthcare 5.0 offers solutions explaining cloud computing's role in managing data and advocating for security measures. It explores federated learning's use in maintaining data privacy during analysis, presenting practical cases for implementation. The book also addresses emerging tech like quantum computing and blockchain-based services, envisioning an innovative Healthcare 5.0. It empowers healthcare professionals, IT experts, and data scientists to leverage these technologies for improved patient care and system efficiency, making Healthcare 5.0 secure and patient-centric. AI and Ed George A. Goens, 2021-11-12 The United States has undergone several major transformations economically, politically, and socially. Today, the impact of artificial intelligence will bring another transformation affecting citizens' private lives as well as employment, communication, politics, and almost every other aspect of life. The question artificial intelligence raises is what kind of education will students need in confronting the obvious and projected impact of technology. Transformations affect obvious aspects of life but also raise significant issues that challenge values, ethics, and standards. The purpose of this book is to define the role of education and its goals, content, and approaches that will assist citizens in addressing the challenges the artificial intelligence movement brings to the life of citizens. Positive aspects of the transformation include communication, productivity, and other issues. However, there are hazards and downsides to artificial intelligence that must be addressed through an educated society. Education's role encompasses assisting individuals to address the positive and negative aspects of any creative intervention. Thinking coupled with insight into principles, ethics, and the meaning of life are critical. Education prepares individuals for changing times in order to protect their freedoms and democracy and find a life of purpose and meaning. **Tactics of Interfacing** Ksenia Fedorova, 2020-08-11 How digital technologies affect the way we conceive of the self and its relation to the world, considered through the lens of media art practices. In *Tactics of Interfacing*, Ksenia Fedorova explores how digital technologies affect the way we conceive of the self and its relation to the world. With the advent of ubiquitous computing, the self becomes an object of technological application increasingly defined by data received from tracking technologies. Subtly, these technologies encourage versions of ourselves that are easier to interpret computationally. Fedorova views these shifts in self-perception through the lens of contemporary media art practices, examining a range of artistic tactics that enable embodied and intimate experiences of machinic operations on our lives. At the center of Fedorova's analysis are the mechanisms that structure the relations between the self and the world at the level of the interface; she considers interfacing a process in which interrelation happens and different agencies play off against each other. She discusses such topics as interfaciality and the face as a medium, self-image, and the boundaries of the self understood through

technological mediation of an embodied experience the relation between the self and the other reshaped by algorithmic technologies and the augmentation and alteration of spatial perception The artworks Fedorova discusses present scenarios of interfacing that range from responsive environments to artificial intelligence conversational agents She shows that art and aesthetic experience offer fruitful ways to reflect on the effects of contemporary technological culture enabling encounters that shift our perspectives on the boundaries of the self and challenge the very capacity to feel human *Human-Computer Interaction.
