Populism and Higher Education Curriculum Development: Problem Based Learning as a Mitigating Response Romeo V.

Turcan, John E. Reilly, 2020-11-21 Against a background of increasing inequality and a rising tide of nationalism and populism this book raises concerns that curriculum is being shaped by powerful non academic non accountable forces and that populism and its manifestations represent a grave challenge to learning It explores the extent to which curriculum and learning methods in higher education should respond to this challenge Using problem based learning as a case study it draws on crossdisciplinary studies to examine how regional national and organizational perspectives emphasize different aspects of PBL It questions whether PBL provides an effective response to external influences and a populist highereducation agenda In conclusion the book poses an uncomfortable question whether graduates reflect the external forces shaping curriculum and hence may be as vulnerable to populist rhetoric as non graduates precisely because the curriculum and learning methods do not engage with the challenges This book will appeal to scholars of problem based learning as well as populism and the role of higher education in society
