Use and Misuse of New Technologies Elena Carpanelli, Nicole Lazzarini, 2019-05-14 The ever increasing use of technology is challenging the current status of the law bringing about new problems and questions The book addresses this trend from the perspective of International law and European Union law and is divided into three main thematic sections The first section focuses on the legal implications of the use of technology either for law enforcement purposes or in the context of military activities and examines how this use adds a new dimension to perennial issues such as the uneasy balance between security concerns and the protection of individual rights and defining the exact scope of certain State obligations In so doing it takes into account a range of current and potential scenarios at the

international regional and domestic level including the use of killer robots databases drones and technology in general to patrol borders exchange information on criminal suspects maintain public order target suspected terrorists and conduct military activities In turn the second section examines the role of institutional and non institutional actors in establishing substantive normative standards for the use of high tech applications In this respect it focuses both on the role that European courts have played so far and on how other actors initiatives can contribute to the construction of a new legal framework for technology related activities Lastly the third section has a two fold focus the first part investigates how the increasing reliance on technology is affecting traditional rules on international responsibility and is challenging in particular the attribution of wrongful conduct to States and international organizations The second part addresses issues of jurisdiction and justiciability Given the scope of its coverage this timely book addresses an important lacuna in the current legal scholarship exploring some of the most recent applications of technology and the legal issues arising as a result Readers will gain novel insights into the challenges posed to International law and European law by the growing reliance on technology taking into account both its uses and misuses
