**Volatility and friction in the age of disintermediation** Tim Sweijs, Stephan De Spiegeleire, Sijbren de Jong, Willem Oosterveld, Hannes Roos, Frank Bekkers, Artur Usanov, Robert de Rave, Karlijn Jans, 2017-02-20 Events unfolded once again at a swirling pace in 2016 Terrorists hit Europe's capital in March The British population voted for Brexit in June Turkish armed forces failed to topple Erdoğan in July A resurgent Russia flexed its military muscles again in the Middle East and actively interfered in American elections in which the American population elected Trump in November We are worried but certainly not surprised by the volatility of contemporary international relations In previous editions of our contribution to the Dutch government's Strategic Monitor we already observed a surge in assertive behavior noted a dangerous uptick in crises and warned for the contagiousness of political violence The current volatility is not a coincidence but rather the result of fundamental disturbances of the global order that are greatly amplified by rapid technological developments Most mainstream explanations of recent turbulence focus on power transitions the decline of the West and the rise of the rest the concomitant return to more aggressive forms of power politics and a backlash against globalization What strikes us is that many of the explanations ignore what we consider one of the most striking mega trends that is reshaping the dynamics of power the ongoing process of disintermediation The StratMon 2016 2017 analyzes global

trends in confrontation cooperation and conflict based on different datasets This year the report also contains case studies on Turkey Moldova and The rise and fall of ISIS Chapters analyzing the many faces of political violence and the other side of the security coin are also included

**Solar Energy Update** , 1979 **Asia's Reckoning** Richard McGregor, 2018-12-04 A Financial Times Best Book of 2017 A shrewd and knowing book Robert D Kaplan The Wall Street Journal A compelling and impressive read The Economist Skillfully crafted and well argued Jeffrey Wasserstrom Financial Times An excellent modern history provides the context needed to make sense of the region s present and future Joyce Lau South China Morning Post A history of the combative military diplomatic and economic relations among China Japan and the United States since the 1970s and the potential crisis that awaits them Richard McGregor s **Asia's Reckoning** is a compelling account of the widening geopolitical cracks in a region that has flourished under an American security umbrella for more

than half a century The toxic rivalry between China and Japan two Asian giants consumed with endless history wars and ruled by entrenched political dynasties is threatening to upend the peace underwritten by Pax Americana since World War II Combined with Donald Trump's disdain for America's old alliances and China's own regional ambitions east Asia is entering a new era of instability and conflict If the United States laid the postwar foundations for modern Asia now the anchor of the global economy Asia's Reckoning reveals how that structure is falling apart With unrivaled access to archives in the United States and Asia as well as to many of the major players in all three countries Richard McGregor has written a tale that blends the tectonic shifts in diplomacy with bitter domestic politics and the personalities driving them It is a story not only of an overstretched America but also of the rise and fall and rise of the great powers of Asia The about turn of Japan from a colossus seemingly poised for world domination to a nation in inexorable decline in the space of two decades has few parallels in modern history as does the rapid rise of China a country whose military is now larger than those of Japan South Korea Taiwan and southeast Asia's combined The confrontational course on which China and Japan are set is no simple spat between neighbors the United States would be involved on the side of Japan in any military conflict between the two countries The fallout would be an economic tsunami affecting manufacturing centers trade routes and political capitals on every continent Richard McGregor's book takes us behind the headlines of his years reporting as the Financial Times's Beijing and Washington bureau chief to show how American power will stand or fall on its ability to hold its ground in Asia

Awakening to China's Rise Hugo Meijer, 2022-08-01 Awakening to China s Rise provides the most comprehensive analysis to date of how Europe s major powers have responded to the re emergence of China as a great power in world politics since the end of the Cold War To do so it puts forward a unique cross regional comparison of how the major European powers France Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe Firstly it analyses their response to China s increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region Secondly it delineates how they have confronted China s inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei s 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People s Republic of China have been driven by a na ve and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing s growing assertiveness after 2009 caused the three major European powers to awaken to China s rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments

**International Organizations and the Management of Regime Complexity** Diana Panke, Sören Stapel, 2025-05-15

Regime complexity which is characterized by overlap between international organizations IOs concerning both policy competencies and member states has been increasing over time It is a defining feature of today s international system As the regime complexity literature points out overlaps between IOs carry potential negative effects such as duplicated efforts or incompatible norms This book argues that IOs can actively manage regime complexity and potentially avoid negative side effects or even create positive benefits Yet overlapping IOs differ in how they react To explain under what conditions IOs disregard overlaps or manage them by resorting to confrontation or collaboration this book addresses the following research questions Why do organizations differ in their responses to overlaps Why do some opt for disregard while others choose confrontation or engage in collaboration These questions are answered by studying a subset of IOs namely regional international organizations RIOs which recruit their member states on the basis of geographic criteria It introduces a novel theoretical selection model on three junctures saliency ideological fit and contextual uncertainties This influences whether overlapping RIOs disregard one another and do not actively manage regional regime complexity low saliency when they choose confrontation high saliency but low ideological fit and when they opt for one of two ways to engage in collaboration namely coordination high saliency high ideological fit limited contextual uncertainty or cooperation high saliency high ideological fit high contextual uncertainty The corresponding hypotheses are comprehensively analyzed in qualitative case studies from Africa the Americas Asia and Europe Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks It brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford

*Greening the Common Agricultural Policy* Great Britain. Parliament. House of Commons. Environment, Food and Rural Affairs Committee, 2012 The European Commission proposes that 30% of direct payments made to farmers under the Common Agricultural Policy CAP would be conditional on compliance with three new greening measures While supporting the Commission s desire to improve the environment the EFRA Committee rejects the approach proposed Instead it calls for the EU to set high level objectives for the CAP that provide for flexibility to apply the right measures for local conditions through decentralising environmental protection under the CAP to Member States This report highlights the huge benefit that UK agri environment schemes have brought to biodiversity food production and the countryside The Committee also urged Defra to ensure that the UK s tenant farmers should not be excluded from these schemes The Committee concludes that Defra must ensure the balance of funding between mandatory and voluntary aspects

of the CAP should not leave UK farmers at a competitive disadvantage relative to their counterparts in the rest of Europe MPs also warn that measures proposed by the Commission would be even more complex than the current system adding costly bureaucracy and generating more errors in the system Likewise the committee concludes that the Commission's crop diversification measure would in the UK have perverse consequences that are far less environmentally beneficial than crop rotation Of the three greening measures offered the Commission's proposal for Ecological Focus Areas EFA has the potential to deliver the greatest environmental benefit However the lack of definitions within the proposals make it difficult to assess what if any such benefits would actually be delivered
