Formulation and Production of Chewing and Bubble Gum Douglas Fritz, 2006-01-30 Beginning with a history of gum Formulation and production of chewing and bubble gum deals with gum formulations shelf life mouthfeel gumbase bulk sweeteners polyols high intensity sweeteners flavourings manufacturing techniques and panning **The Science of Sugar**

Confectionery William P Edwards, 2015-11-09 Confectionery is a topic close to many people's hearts and its manufacture involves some interesting science The confectionery industry is divided into three classes chocolate flour and sugar confectionery It is the background science of this latter category that is covered in *The Science of Sugar Confectionery* The manufacture of confectionery is not a science based industry as these products have traditionally been created by skilled confectioners working empirically In fact scientific understanding of the production process has only been acquired retroactively Historically however sugar confectionery has had technological synergies with the pharmaceutical industry such as making sugar tablets and applying panned sugar coatings This book gives an introduction to the subject with some basic definitions and commonly used ingredients and then moves on to discuss the chemistry of various types of sugar confectionery These include sugar glasses boiled sweets grained sugar products fondants toffees and fudges hydrocolloids gums pastilles and jellies and concludes with a chapter dedicated to sugar free confectionery **Water Activity in Foods**

Gustavo V. Barbosa-Cánovas, Anthony J. Fontana, Jr., Shelly J. Schmidt, Theodore P. Labuza, 2020-06-16 This second edition of *Water Activity in Foods* furnishes those working within food manufacturing quality control and safety with a newly revised guide to water activity and its role in the preservation and processing of food items With clear instructional prose and illustrations the book's international team of contributors break down the essential principles of water activity and water food interactions delineating water's crucial impact upon attributes such as flavor appearance texture and shelf life The updated and expanded second edition continues to offer an authoritative overview of the subject while also broadening its scope to include six newly written chapters covering the latest developments in water activity research Exploring topics ranging from deliquescence to crispness these insightful new inclusions complement existing content that has been refreshed and reconfigured to support the food industry of today **Encapsulation and Controlled Release Technologies in Food**

Systems Jamileh M. Lakkis, 2016-03-09 The emergence of the discipline of encapsulation and controlled release has had a great impact on the food and dietary supplements sectors principally around fortifying food systems with nutrients and health promoting ingredients The successful incorporation of these actives in food formulations depends on preserving their stability and bioavailability as well as masking undesirable flavors throughout processing shelf life and consumption This second edition of *Encapsulation and Controlled Release Technologies in Food Systems* serves as an improvement and a complement companion to the first However it differentiates itself in two main aspects Firstly it introduces the reader to novel encapsulation and controlled release technologies which have not yet been addressed by any existing book on this

matter and secondly it offers an in depth discussion on the impact of encapsulation and controlled release technologies on the bioavailability of health ingredients and other actives In common with the first edition the book includes chapters written by distinguished authors and researchers in their respective areas of specialization This book is designed as a reference for scientists and formulators in the food nutraceuticals and consumer products industries who are looking to formulate new or existing products using microencapsulated ingredients It is also a post graduate text designed to provide students with an introduction to encapsulation and controlled release along with detailed coverage of various encapsulation technologies and their adaptability to specific applications

Food Texturology: Measurement and Perception of Food Textural Properties Andrew Rosenthal, Jianshe Chen, 2023-12-20 The concept behind this book is to take a holistic view of food texture starting with the determination of food texture its perception in the mouth and its measurement by both sensory and instrumental methods and to examine the relation between them The book has been divided into four sections Fundamentals Sensory and Human Interactions Instrumental Analysis and Food Products Essentially we cover the techniques used for measuring food texture and then apply them to the different product groups Readers of the first edition will notice the title has changed with the adoption of the term texturology In the long history of food texture research texturology has been occasionally used in literature The term texturology has not been widely accepted by texture researchers texturologists because of their concern over whether the theories and techniques are broad and strong enough to support texture research as a scientific discipline During the 24 years since the publication of the first edition the editors have observed vast developments in theories as well as the assessment methodology of food texture both sensory and instrumental and these have shaped our understanding This second edition brings the science up to date by introducing topics not previously covered e g psychophysics tribology oral processing texture maps and special foods for dysphagia patients It includes an expos of the instruments to measure food texture and also considers techniques for measuring consumer perception of food texture in addition to the sensory properties Additionally it amends omissions from the first edition such as dairy products fish bakery products and sugar confectionery as product groups All in all it is expanded and updated in its coverage of food texturology as a coherent scientific discipline

Italy and the Ecological Imagination: Ecocritical Theories and Practices Damiano Benvegnù, Matteo Gilebbi, 2022-10-04 What can Italy teach us about our relationships with the nonhuman world in the current socio environmental crisis Italy and the Ecological Imagination Ecocritical Theories and Practices focuses on how Italian writers activists visual artists and philosophers engage with real and fictional environments and how their engagements reflect critique and animate the approach that Italian culture has had toward the physical environment and its ecology since late antiquity Through a comparative and interdisciplinary approach the essays collected in this volume explore topics including climate change environmental justice animal ethics and socio environmental degradation to provide a cogent analysis of how Italian ecological narratives fit within the current transnational debate occurring in the Environmental

Humanities The aim of Italy and the Ecological Imagination is thus to explore non anthropocentric modes of thinking and interacting with the nonhuman world The goal is to provide accounts of how Italian historical records have potentially shaped our environmental imagination and how contemporary Italian authors are developing approaches beyond humanism in order to raise questions about the role of humans in a possible or potentially post natural world Ultimately the volume will offer a critical map of Italian contributions to our contemporary investigation of the relationships between human and nonhuman habitats and communities
