Post-Fukushima Activism Azumi Tamura, 2018-05-23 Political disillusionment is widespread in contemporary society In Japan the search for the outside of a stagnant reality sometimes leads marginalised young people to a disastrous image of social change The Fukushima nuclear disaster was the realisation of such an image triggering the largest wave of activism since the 1960s The disaster revealed the interconnected nature of contemporary society The protesters regretted that their past indifference to politics prefigured such a catastrophe and became motivated to protest in the streets They did not share any totalising ideology or predetermined collective identity Instead the activism provided a space for each body to encounter others who forced them to feel and think which also introduced an ethical dimension to their politics In this book Azumi Tamura proposes a concept

of politics as a series of endless experiments based on creative responses to unexpected forces. Instead of searching for a transcendental reference for politics, she investigates an immanent force within individuals that motivates them to become involved in political action. Referencing Deleuzian philosophy, Tamura provides a different epistemological and ontological approach to the social movement studies. She suggests social movements themselves generate knowledge about how one may live better in a complex society and where our lives are exposed to uncertainty. This knowledge is neither empirical knowledge nor normative political theory of how we should live. Instead, social movements bring affective knowledge into politics as they offer a space for experimenting with how we might live. The encounter with such knowledge galvanizes our desire for how we want to live and encourages new experiments.

Philosophy of the Tourist Hiroki Azuma, 2023-05-09. An inventive philosophical study that reconsiders the figure of the tourist. Tourism is a characteristically modern phenomenon, yet modern thinkers have tended to deride the tourist as a figure of homogenizing globalism. This philosophical study considers the tourist anew as a subject position that enables us to redraw the map of globalized culture in an era increasingly in revolt against the liberal intellectual worldview and its call for the welcome of the Other. Why has the tourist proved so resistant to philosophical treatment, asks Hiroki Azuma. Tracing the reasons for this exclusion through the work of Rousseau and Voltaire and subsequently in Kant, Carl Schmitt, Alexandre Kojève, Hannah Arendt, and Hardt and Negri, Azuma contends that the figure of the tourist has been rendered illegible by becoming ensnared in a series of misleading conceptual dichotomies and a linear model of world history. In the widening gap between the infrastructure of globalization and inherited ties of local and national belonging, Azuma's retheorization of the tourist presents an alternative to the choice between doubling down on local identity and roots or hoping for the spontaneous uprising of a multitude from within the great networked Empire. For the tourist is the subject capable of moving most freely between the strata of the global and the local. With explorations of the connection between tourism and fan fiction, contingency and misdelivery, cyberspace and the uncanny, and dark tourism, Azuma's inventive and optimistic philosophical essay sheds unexpected new light on a mode of engagement with the world that is familiar to us all.

General Will 2.0 Hiroki Azuma, 2014-11-25. Stay informed. Talk about the issues. Always be engaged. Liberal societies have encouraged their members to take part or at least interest in politics. Yet even in developed nations where it is said to work, the democratic process as we know it routinely fails to give voice on the one hand and to appeal at all on the other hand to a good number of citizens. Whatever countervailing hopes the worldwide web gave rise to in its dawning years, far from restoring the public sphere of yore, the internet has completed its fragmentation. According to Japanese thinker Hiroki Azuma, the way forward must be sought through what network technology is actually good at: aggregating and processing the traces we leave without always meaning to. Every time we wade into the world of connectivity, harking back to Rousseau and his idea of the general will, dropping by Freud and his discovery of the unconscious, taking inspiration from Google and the tenor of its innovations, revisiting Christopher Alexander

and his highway planning and making curious bedfellows of Twitter Rorty and Nozick General Will 20 is a wild ride bound to delight not just citizens who care but those who find doing so to be increasingly difficult and false **Textual Cacophony** Daniel Johnson, 2023-10-15 No detailed description available for Textual Cacophony **Investigating Google's Search Engine** Rosie Graham, 2022-12-15 What do search engines do And what should they do These questions seem relatively simple but are actually urgent social and ethical issues The influence of Google's search engine is enormous It does not only shape how Internet users find pages on the World Wide Web but how we think as individuals how we collectively remember the past and how we communicate with one another This book explores the impact of search engines within contemporary digital culture focusing on the social cultural and philosophical influence of Google Using case studies like Google's role in the rise of fake news instances of sexist and misogynistic Autocomplete suggestions and search queries relating to LGBTQ values it offers original evidence to intervene practically in existing debates It also addresses other understudied aspects of Google's influence including the profound implications of its revenue generation for wider society In doing this this important book helps to evaluate the real cost of search engines on an individual and global scale **Wild Lines and Poetic Travels** Doug Slaymaker, 2021-07-29 This volume of essays and translations analyzes the prodigious and wide ranging output of Keiji Suga Based in Japan Keiji Suga's works are wide ranging and multilingual His volumes of poetry have been shortlisted for a range of poetry prizes and he was awarded the 2011 Yomiuri Shinbun Prize for Travel writing He has translated dozens of books and has authored or co authored more than fifteen other books across various genres He is by his own introduction a poet first but is also a prolific book reviewer an astute theorist and an insightful critic His presence and contributions have been profound in many countries around the globe **General Intellects** McKenzie Wark, 2017-05-16 A guide to the thinkers and the ideas that will shape the future What happened to the public intellectuals that used to challenge and inform us Who is the Sartre or De Beauvoir of the internet age General Intellects argues that we no longer have such singular figures but we do have general intellects whose writing could if read together explain our times Covering topics such as culture politics work technology and the Anthropocene each chapter is a concise account of an individual thinker providing useful context and connections to the work of the others McKenzie Wark's distinctive readings are appreciations but are also critical of how neoliberal universities militate against cooperative intellectual work to understand and change the world The thinkers included are Amy Wendling Kojin Karatani Paolo Virno Yann Moulier Boutang Maurizio Lazzarato Franco Bifo Berardi Angela McRobbie Paul Gilroy Slavoj Žižek Jodi Dean Chantal Mouffe Wendy Brown Judith Butler Azumi Hiroki Paul B Prigod Wendy Chun Timothy Morton Quentin Meillassoux Isabelle Stengers and Donna Haraway **The Development of Global Legislative Politics** Takashi Inoguchi, Lien Thi Quynh Le, 2019-11-09 This book is the first systematic scientific study of global quasi legislation Taking public opinion and multilateral agreements as the international equivalent to national election and passing laws on the national scale and extending nation state concepts to a global society it analyzes citizens preferences

and the state's willingness to enter into 120 multilateral treaties. After identifying the links as a first step toward conceptualizing quasi-legislative global politics, the book examines how each of the 193 states manifests quasi-legislative behavior by factor analyzing six instrumental variables such as treaty participation index and six policy domains of multilateral treaties including peace and trade. It then discusses global change between 1989 and 2008 and conceptually and empirically examines the three theories of global politics that originated during that period: the theory of power transition, theory of civilizational clash, and theory of global legislative politics. Lastly, it proposes a theory of global legislative politics. Shedding fresh light on the transformative nature of multilateral treaties, this book attracts researchers and students in political philosophy, international law, and international relations, as well as practitioners and journalists. Inoguchi and Le have developed a genuinely original perspective on world politics, one that opens up a new research agenda for thinking about state and global actors simultaneously.

Anne Marie Slaughter, Bert G. Kerstetter 66 University Professor Emerita of Politics and International Affairs, Princeton University. This is one of those books that warrant a global readership given its emphasis on the implied trust that we invest in public institutions as viewed from an interdisciplinary perspective.

Richard J. Estes, Professor of Social Policy Practice, University of Pennsylvania, Philadelphia, Pennsylvania. This book is innovative and distinctive in carving out a new way to look at global legislative politics. I do not know of anything that compares in this interesting and novel niche of international relations analysis.
