Walter,2021-07-15 This book presents the results of a series of literacy experiments in ten Niger Congo languages
representing four language families and spanning five countries It asks the research question To what extent does full tone
marking contribute to oral reading fluency comprehension and writing accuracy and does that contribution vary from
language to language One of the main findings is that the ethno literacy profile of the language community and the social
profile of the individual are stronger predictors of reading and writing performance than are the linguistic and orthographic
profiles of the language Our data also suggest that full tone marking may be more beneficial for less educated readers and
those with less experience of L1 literacy The book will bring practical help to linguists and literacy specialists in Africa and
beyond who are helping to develop orthographies for tone languages It will also be of interest to cognitive psychologists
exploring the reading process and researchers investigating writing systems **THE EARLY GRADE READING**
ASSESSMENT Amber K. Gove,Anna Wetterberg,2011-09-28 The Early Grade Reading Assessment EGRA measures students
progress towards reading EGRA gauges early literacy skills through a 15 minute individual oral assessment of five
fundamental reading skills RTI worked with education experts to develop the EGRA in 2006 and it has been piloted and
implemented in more than 40 countries This volume aims to take stock of the substantial amount of information and
experience generated through the use of EGRA and to share this knowledge with practitioners policymakers and
international donors Chapters cover not only particular applications of the instrument but also put EGRA in the context of
broader issues and developments in literacy and education **Education Statistics** ,2005 **Report of the National**
