Industrial Electronics Handbook William D. Cockrell, 1958 **Design of a Non-isolated Single Phase Online UPS Topology with Parallel Battery Bank for Low Power Applications** Muhammad Aamir, 2018-07-14 This book presents a new topology of the non isolated online uninterruptible power supply UPS system consisting of 3 components bridgeless boost rectifier battery charger discharger and an inverter The online UPS system is considered to be the most preferable UPS due to its high level of power quality and proven reliability against all types of line disturbances and power outages The new battery charger discharger reduces the battery bank voltage which improves performance and reliability while a new control method for the inverter regulates the output voltage for both linear and nonlinear loads The proposed USP system shows an efficiency of 94% during battery mode and 92% during the normal mode of operation *Selected Papers from the 5th International Electronic Conference on Sensors and Applications* Francisco Falcone, Stefano Mariani, Francesco Ciucci, Dirk Lehmhus, Thomas B.
