Dept. of the Air Force,1987 **The Conduct of Hostilities in International Humanitarian Law, Volume I** Wolff

Heintschel von Heinegg,2023-06-14 This volume is the first of two addressing the legal regime governing the use of force during armed conflicts Traditionally labeled Hague Law today the norms it examines are commonly referred to as conduct of hostilities rules At the heart of this body of law is the principle of distinction which requires that civilians and civilian objects be distinguished from combatants and military objectives during military operations It is the purest expression of the foundational balance between humanitarian considerations and military necessity that has underpinned international humanitarian law since its inception The essays selected consider the theoretical and practical difficulties of maintaining the balance in the face of evolving means and methods of warfare and competing perspectives as to how it is best achieved Also addressed is the law governing warfare at sea and in the air Essays focusing on the former examine early norms and analyze their continuing relevance to today s maritime operations whilst those exploring the latter inject much needed clarity into the subject an essential task in light of the centrality of aerial warfare in modern combat operations Air Power Against Terror

Benjamin S. Lambeth,2005 The terrorist attacks of 9 11 plunged the United States into a determined counteroffensive against Osama bin Laden and his al Qaeda terrorist network This report details the initial U S military response to those attacks namely the destruction of al Qaeda s terrorist infrastructure and the removal of the ruling Taliban regime in Afghanistan The author emphasizes several distinctive achievements in this war including the use of precision air delivered weapons that were effective irrespective of weather the first combat use of Predator unmanned aerial vehicles armed with Hellfire missiles and the integrated employment of high altitude drones and other air and space based sensors that gave

CENTCOM unprecedented round the clock awareness of enemy activity Weaponneering Morris R. Driels,2004 This is the first comprehensive text to describe and quantify the methods commonly used to predict the probability of successfully attacking ground targets using air launched or ground launched weapons Air launched weapons include guided and unguided bombs air to ground missiles laser guided bombs rockets and guns Surface engagements cover both direct and indirect fire weapons The text outlines the various methodologies used in operational products used widely in the U S Army Navy Air Force and Marine Corps It explains the underlying methodologies for the key munitions effectiveness tools Joint Air to Surface Weaponneering Systems JAWS and JMEM SS Weapons Effectiveness Systems **JTCG/ME, Joint Technical Coordinating Group for Munitions Effectiveness** ,2003 *Weaponneering for the Warfighter* Morris R. Driels,2021 Experience has shown warfighters desire to understand more than just the buttonology of using weaponneering tools This book uses much of the knowledge and material utilized in the author s previous texts but with an emphasis on breadth and real world topics and examples to put the underlying methods in the context of how they are applied
