Ruggiero, Vincenzo

Joas Special Edition 201:

Understanding Political Violence: A Criminological Approach Ruggiero, Vincenzo, 2006-03-01 The author distinguishes between political violence from below for example collective violence insurgency armed struggle and terrorism and political violence from above which includes indiscriminate repression institutional and state violence torture and war [A Life Devoted to Quality of Life](#) Filomena Maggino, 2015-10-20 This Festschrift is published in honor of Alex C Michalos a great scholar and inspiration to many upcoming and famous academics and practitioners The Festschrift celebrates his lifelong outstanding scientific and cultural contribution to Quality of Life Research It contains contributions written by the most prestigious and renowned scholars in the field of social indicators research and quality of life studies Taken together the contributions from scholars around the world reflect Michalos stance that even though there may be differences in individual scientific positions the language in the field of quality of life has no limits and boundaries **The Oxford Handbook of Philosophy of Physics** Robert Batterman, 2013-03-14 This Oxford Handbook provides an overview of many of the topics that currently engage philosophers of physics It surveys new issues and the problems that have become a focus of attention in recent years It also provides up to date discussions of the still very important problems that dominated the field in the past In the late 20th Century the philosophy of physics was largely focused on orthodox Quantum Mechanics and Relativity Theory The measurement problem the question of the possibility of hidden variables and the nature of quantum locality dominated the literature on the quantum mechanics whereas questions about relationalism vs substantivalism and issues about underdetermination of theories dominated the literature on spacetime These issues still receive considerable attention from philosophers but many have shifted their attentions to other questions related to quantum mechanics and to spacetime theories Quantum field theory has become a major focus particularly from the point of view of algebraic foundations Concurrent with these trends there has been a focus on understanding gauge invariance and symmetries The philosophy of physics has evolved even further in recent years with attention being paid to theories that for the most part were largely ignored in the past For example the relationship between thermodynamics and statistical mechanics once thought to be a paradigm instance of unproblematic theory reduction is now a hotly debated topic The implicit and sometimes explicit reductionist methodology of both philosophers and physicists has been severely criticized and attention has now turned to the explanatory and descriptive roles of non fundamental phenomenological theories This shift of attention includes old theories such as classical mechanics once deemed to be of little philosophical interest Furthermore some philosophers have become more interested in less fundamental contemporary physics such as condensed matter theory Questions abound with implications for the nature of models idealizations and explanation in physics This Handbook showcases all these aspects of this complex and dynamic discipline [The Varieties of Transcendence](#) Hans Joas, Matthias Jung, Magnus Schlette, 2016-02-01 The Varieties of Transcendence traces American pragmatist thought on religion and its relevance for

theorizing religion today The volume establishes pragmatist concepts of religious individualization as powerful alternatives to the more common secularization discourse In stressing the importance of Josiah Royce s work it emphasizes religious individualism s compatibility with community At the same time by covering all of the major classical pragmatist theories of religion it shows their kinship and common focus on the interrelation between the challenges of contingency and the semiotic significance of transcendence Position and Responsibility Ilsup Ahn,2009-06-08 What is the moral criterion for those who

hold power positions and authority in governments corporations and institutions Ahn answers this question by presenting the concept of the positional imperative The positional imperative is an executive moral norm for those who hold power positions in political and economic organizations By critically integrating the Neo Kantian reconstructionism of Jurgen Habermas with the Neo Augustinian reconstructionism of Reinhold Niebuhr through the method of co reconstruction Ahn identifies the positional imperative as an executive moral norm embedded in all power positions Act in such a way not only to abide by laws but also to come by the approvals of those affected by your positional actions By uncovering this executive moral norm Ahn argues that a position holder is not just a professional working for the system but a moral executive who is willing to take the responsibility of his or her positional actions *The Oxford Handbook of Émile Durkheim* Hans Joas,Andreas

Pettenkofer,2024 mile Durkheim remains one of the most controversial and one of the most deeply misunderstood classics of social theory The Oxford Handbook of mile Durkheim takes stock of the different recent debates on Durkheimian sociology and makes them accessible to a wide audience spanning various disciplines this includes crucial debates that due to language barriers are not easily accessible for an English reading public In doing so this volume is an important resource for all scholars and students looking to understand Durkheimian sociology **Forthcoming Books** Rose Arny,2003 **“The”**
