John Bradshaw Cat Sense:

Cat Sense John Bradshaw, 2013-09-10 Cats have been popular household pets for thousands of years and their numbers only continue to rise Today there are three cats for every dog on the planet and yet cats remain more mysterious even to their most adoring owners Unlike dogs cats evolved as solitary hunters and while many have learned to live alongside humans and even feel affection for us they still don't quite get us the way dogs do and perhaps they never will But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company In *Cat Sense* renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before using cutting edge scientific research to dispel the myths and explain the true nature of our feline friends Tracing the cat's evolution from lone predator to domesticated companion Bradshaw shows that although cats and humans have been living together for at least eight thousand years cats remain independent predatory and wary of contact with their own kind qualities that often clash with our modern lifestyles Cats still have three out of four paws firmly planted in the wild and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10 000 years ago Cats are astonishingly flexible and given the right environment they can adapt to a life of domesticity with their owners but to continue do so they will increasingly need our help If we're to live in harmony with our cats Bradshaw explains we first need to understand their inherited quirks understanding their body language keeping their environments however small sufficiently interesting and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats A must read for any cat lover *Cat Sense* offers humane penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our pets lives and ours

Cat Sense John W. S. Bradshaw, 2013 From John Bradshaw one of the world's leading experts on animal behaviour and the author of the Sunday Times bestseller *In Defence of Dogs* comes a scientific portrait of the true surprising nature of cats Worshipped as gods feared as demonic servants seen as both wild opportunists and beloved companions cats often seem as unfathomable enigmatic and magical to us today as they did in ancient times They have lived with humans for at least ten thousand years far earlier than the reign of the Pharaohs and today are the most popular pet in the world That they now outnumber the dog man's best friend by three to one is small wonder at once affectionate and self-reliant they seem to be perfectly suited to our busy 21st Century lifestyles Yet cats still think like the wild scavengers and hunters from which they are descended and to which they can quickly revert Today they face unprecedented challenges in their life with humans from conservationists who cast them as a threat to wildlife from other cats who they compete for territory with and from good intentioned owners and vets with misconceptions of what they require Cats need not so much our sympathy but our understanding if they are to continue to enjoy our companionship The recent surge in feline science with John Bradshaw at the forefront means we are now better equipped to understand them than ever before *Cat Sense* offers us for the first time a true picture of one of

humanity's closest and most enigmatic companions Praise for John Bradshaw's *In Defence of Dogs* The most fantastic book a revelation Observer Essential reading Daily Telegraph Nothing less than a manifesto for a new understanding Guardian A case grounded in kindness and science Authoritative wise and rather moving Independent Read this book Sunday Times

The Trainable Cat John Bradshaw, Sarah Ellis, 2016-09-13 The idea of training rarely crosses cat owners' minds and we often assume that cats can't and don't need to be trained But in *The Trainable Cat* bestselling anthrozoologist John Bradshaw and cat expert Sarah Ellis show that not only can cats be trained but they absolutely must be in order to strengthen the bond between pet and owner reduce their anxiety and maximize their happiness Amazon.com

The Animals Among Us John Bradshaw, 2017-10-31 A leading anthrozoologist and the bestselling author of *Dog Sense* and *Cat Sense* explains why we are so drawn to pets Historically we relied on our pets to herd livestock guard homes and catch pests But most of us don't need animals to do these things anymore Pets have never been less necessary And yet pet ownership has never been more common than it is today half of American households contain a cat a dog or both Why are pets still around In *The Animals Among Us* John Bradshaw one of the world's leading authorities on the relationship between humans and animals argues that pet ownership is actually an intrinsic part of human nature He explains how our empathy with animals evolved into a desire for pets why we still welcome them into our families and why we mourn them so deeply when they die Drawing on the latest research in biology and psychology as well as fields as diverse as robotics and musicology *The Animals Among Us* is a surprising and affectionate history of humanity's best friends

From the importance of play to techniques for reducing stress, each section provides practical tools to strengthen the human-cat bond. This book will not only change your perspective on your feline but also help create a more harmonious home tailored to their complex nature.

Our Wild Calling Richard Louv, 2019-11-05 A book that offers hope. The New York Times Book Review: Richard Louv has done it again. A remarkable book that will help everyone break away from their fixed gaze at the screens that dominate our lives and remember instead that we are animals in a world of animals. Bill McKibben, author of *Falter*. Richard Louv's landmark book *Last Child in the Woods* inspired an international movement to connect children and nature. Now Louv redefines the future of human-animal coexistence. *Our Wild Calling* explores these powerful and mysterious bonds and how they can transform our mental, physical, and spiritual lives. It serves as an antidote to the growing epidemic of human loneliness and helps us tap into the empathy required to preserve life on Earth. Louv interviews researchers, theologians, wildlife experts, indigenous healers, psychologists, and others to show how people are communicating with animals in ancient and new ways: how dogs can teach children ethical behavior, how animal-assisted therapy may yet transform the mental health field, and what role the human-animal relationship plays in our spiritual health. He reports on wildlife relocation and on how the growing populations of wild species in urban areas are blurring the lines between domestic and wild animals. *Our Wild Calling* makes the case for protecting, promoting, and creating a sustainable and shared habitat for all creatures, not out of fear but out of love. Transformative and inspiring, this book points us toward what we all long for in the age of technology: real connection.

The Cat's Meow Jonathan B. Losos, 2023-05-02 The past, present, and future of the world's most popular and beloved pet, from a leading evolutionary biologist and great cat lover. Engaging and wide-ranging, *The Cat's Meow* is a readable and informed exploration of the wildcat that lurks within. Fluffy: The Washington Post. The domestic cat, your cat, has from its evolutionary origins in Africa been transformed in comparatively little time into one of the most successful and diverse species on the planet. Jonathan Losos, writing as both a scientist and a cat lover, explores how researchers today are unraveling the secrets of the cat past and present using all the tools of modern technology: from GPS tracking you'd be amazed where those backyard cats roam, to genomics, what is your so-called Siamese cat really, to forensic archaeology. In addition to solving the mysteries of your cat's past, it gives us a cat's-eye view of

today's habitats including meeting wild cousins around the world whose habits your sweet house cat sometimes eerily parallels Do lions and tigers meow If not why not Why does my cat leave a dead mouse at my feet or on my pillow Is a pet ocelot a bad idea When and why did the cat make its real leap off the African plain What's with all those cats in Egyptian hieroglyphics In a genial voice casually deciphering complex science and history with many examples from his own research and multi cat household Losos explores how selection both natural and artificial over the last several millennia has shaped the contemporary cat with new breeds vastly different in anatomy and behavior from their ancestral stock Yet the cat ever a predator still seems only one paw out of the wild and readily reverts to its feral ways as it occupies new lands around the world Humans are transforming cats and they in turn are transforming the world around them This charming and intelligent book suggests what the future may hold for both *Felis catus* and *Homo sapiens* **The Animals Among Us** John Bradshaw, 2017-09-28 A pioneering study richly empathetically and affectionately respectful of the human animal bond Sunday Times Why do humans love animals The bestselling author of *In Defence of Dogs* and *Cat Sense* gives us the answers Keeping pets is expensive time consuming and seemingly irrational so why do so many of us have an animal in our lives Modern day pet keeping has been justified for many reasons from the potential therapeutic role pets can play to their appealing cuteness But pet keeping is much more than just a simple pastime It is part of the broader history of humanity's relationship with animals a relationship that comes from deep within our nature As John Bradshaw reveals in this highly original new work our connection with animals is one of the very things that makes us human In *The Animals Among Us* Bradshaw takes us to the heart of Anthrozoology a new science dedicated to discovering the true nature and depth of the human animal bond Following the thread of our affection for animals from today's pet lovers all the way back to our ancient ancestors Bradshaw reveals how animals have always been an integral part of our lives indeed they have shaped the evolution of our minds and our bodies The ways in which we relate to animals today stem ultimately from our evolutionary journey from hominid to *Homo sapiens* An affinity for animals drove our evolution as humans Now as increasing numbers of species are under threat John Bradshaw shows us that pet keeping can act as a bridge between the domestic and the wild even aiding conservation If we lose the animals among us he warns we risk losing an essential part of ourselves
