**CAUTION!** Do not lubricate or adjust tractor while engine is running unless recommended.

When servicing mechanical front-wheel drive equipped tractor with rear wheels supported off ground and engine running, always support front wheels in a similar manner. Loss of electrical power or transmission-hydraulic system pressure will engage front driving wheels, pulling rear wheels off support if front wheels are not raised.

Under these conditions, note that the front drive wheels can engage even with switch in disengaged position.

**IMPORTANT!** After having serviced, cleaned or repaired your tractor, always reinstall any safety guards or shields removed before operating.
