Cities and Agriculture Henk de Zeeuw, Pay Drechsel, 2015-09-16 As people increasingly migrate to urban settings and more than half of the world's population now lives in cities it is vital to plan and provide for sustainable and resilient food systems which reflect this challenge This volume presents experience and evidence based state of the art chapters on the key dimensions of urban food challenges and types of intra and peri urban agriculture The book provides urban planners local policy makers and urban development practitioners with an overview of crucial aspects of urban food systems based on an up to date review of research results and practical experiences in both developed and developing countries By doing so the international team of authors provides a balanced textbook for students of the growing number of courses on sustainable agriculture food and urban studies as well as a solid basis for well informed policy making planning and implementation regarding the development of sustainable resilient and just urban food systems *Biodiversity of Ecosystems* Levente Hufnagel, 2022-09-28 Biodiversity of Ecosystems gives a detailed report and extensive overview of the frontiers of pure and applied biodiversity research Chapters address such topics as abiotic factors that affect biodiversity the efforts of conservation and sustainability and urban and agricultural ecosystems and include case studies about special methodical problems and research approaches *China's Peasant Agriculture and Rural Society* Jan Douwe van der Ploeg, Jingzhong Ye, 2016-05-20 China's agriculture and rural society has undergone rapid changes in recent years Many poorer farmers and younger people have moved to cities and yet China has an immense challenge to feed a growing and more affluent population This book provides a bottom up view of China's agriculture showing how the many millions of Chinese peasants make a living It presents a vivid description of the mechanisms used by rural households to defend and sustain their livelihoods increase their agricultural production and improve the quality of their lives The authors examine the newly emerging trajectories of entrepreneurial and capitalist farming and assess whether such alternatives will be able to meet the enormous social economic and environmental challenges that China faces The book also explores the paradigm that has underpinned the organisation and development of China's agriculture from ancient times to the present day This shows the importance of balancing in the Chinese model as compared to the one sided imposition of continual modernization in the western model It is argued that such balancing is at the core of the current Sannong policy referring to the three ruralities of food sovereignty wellbeing for peasant households and an attractive countryside *Informal Urban Agriculture* Michael Hardman, Peter J. Larkham, 2014-10-01 The book explores how unused and under used urban spaces from grass verges roundabouts green spaces have been made more visually interesting and more productive by informal and usually illegal groups known as guerrilla gardeners The book focuses on groups in the English Midlands but the work is set in a broad international context and reveals how and why they undertake this illegal activity Guerrilla gardening is usually viewed uncritically and promoted as a worthwhile activity this study provides a more balanced evaluation and focuses on its contribution in terms of local food

production Global Issues and Talent Development Khali Dirani, Fredrick. M. Nafukho, Beverly Irby, 2018-10-01 Talent management TM and talent development TD are of the most important areas of focus for organizational leaders and scholars around the world Machado 2015 Geographic boundaries have become increasingly permeable with talent considerations being a key factor in the decision of where organizations locate their operations Farndale Scullion Sparrow 2010 These changes in global market conditions have lead organizations to develop robust global talent management and development strategies that help organizations attract and retain the best talent Nilsson Ellstr m 2012 Still most international TM and TD initiatives can be described as ad hoc non strategic or based on exported models from the West Machado 2015 From an operational perspective although there is a surge in research on TM and TD practices across different regions most of what we know about these topics is based on government and practitioners reports Nowadays organizations are operating in diverse environments catalyzed by globalization economic openness and governmental smart visions and practical policies Governments and organizations alike are aspiring to become talent magnet destination attracting expatriates from all over the world The question we try to answer in this book is whether entities are able to continue their growth through current TM and TD practices or whether a more strategic approach is needed in order to address the current TM and TD challenges and to meet the needs of individuals organizations and governments In particular in this book we provide different perspectives of current status of TM and TD practices in select countries across the world Our aim is to provide scholars and practitioners interested in the topic with a better understanding of TM and TD practices and an overview of factors that affect these practices Once we understand the different challenges practitioners and leaders can use TM and TD as a source of power or a strategy that can lead people and organizations into success **Achieving sustainable urban agriculture** Prof Johannes S.
