knowledge about courts and judges Intention, Supremacy and the Theories of Judicial Review John McGarry, 2016-07-28

In the late 1980s a vigorous debate began about how we may best justify in constitutional terms the English courts jurisdiction to judicially review the exercise of public power derived from an Act of Parliament Two rival theories emerged in this debate the ultra vires theory and the common law theory The debate between the supporters of these two theories has never satisfactorily been resolved and has been criticised as being futile Yet the debate raises some fundamental questions about the constitution of the United Kingdom particularly the relationship between Parliament and the courts the nature of parliamentary supremacy in the contemporary constitution and the possibility and validity of relying on legislative intent This book critically analyses the ultra vires and common law theories and argues that neither offers a convincing explanation for the courts judicial review jurisdiction Instead the author puts forward the theory that parliamentary supremacy and in turn the relationship between Parliament and the courts is not absolute and does not operate in a hard and fast way but rather functions in a more flexible way and that the courts will balance particular Acts of Parliament against competing statutes or principles McGarry argues that this new conception of parliamentary supremacy leads to an alternative theory of judicial review which significantly differs from both the ultra vires and common law theories This book will be of great interest to students and scholars of UK public law *Equitable Compensation and Disgorgement of Profit* Simone Degeling, Jason NE

Related Party Transactions and Corporate Groups

Ivan Romashchenko, 2020-03-06 In a market environment where economic actors conduct themselves as diligent and conscientious managers the regulation of related party transactions RPTs would be largely irrelevant Unfortunately the corporate reality is far from an ideal world that is innocent of market abuse and corporate fraud It remains necessary to protect minority shareholders from the wrongdoings of majority shareholders and to protect all shareholders from opportunistic managerial behaviour This timely book the first on the subject since implementation of the European Union's EU's revised Shareholders Rights Directive provides in depth analysis of how and to what extent RPTs are covered by existing legal requirements on capital protection and corporate group regulation highlighting experiences and strategies adopted in Germany Poland and the Netherlands as examples for Eastern European countries and in particular Ukraine Beyond his comparative analysis of the current status the author offers recommendations for more effective handling of RPTs investigating such aspects as the following what constitutes a corporate group and how group issues are regulated in the various legal systems what constitutes a conflict of interest originating in ownership and control and what types of such conflicts occur whether RPTs within corporate groups should receive special treatment relative to transactions outside groups combatting corporate raiding most often carried out through illegal seizure of corporate assets approval and disclosure requirements for RPTs and how information about RPTs is disclosed publicly Drawing on resources including legislation case law scholarship and intensive discussions with practicing lawyers from several jurisdictions the author underscores the imperative of establishing limitations and requirements that oblige a company's officers shareholders and other potential related parties to follow certain rules whenever they wish to enter into an RPT As a contribution to the debate about the convergence between EU corporate law and that of major eastern European states the book has no peers Practitioners in both East and West who advise on compliance with regulations for RPTs or represent stakeholders interests against abusive RPTs will ensure appropriate remedies and protection mechanisms for their clients
