Keerthi Abeywickrama, Pradeep Kumar Jha,2020-08-13 Productivity improvement means doing the same thing in a better
and smarter way and continuing to work on improving the techniques for an individual or a team on the shopfloor And this
continuous improvement is the only way to achieve high profitability Garment manufacturing involves number of operations
carried out by different operators and all the activities starting from cutting sewing till finishing are different from each other
in terms of the way they are performed and the technology being used for them So it is always advisable to look at the
working of four aspects and that are material machine men and method However there are ways to build higher productive
efficiencies which result in reduction in cost and bring in higher profit margin The book discusses different case studies from
the shopfloor showing productivity improvements *Advances in Sewn Product Technology* Anita Mitchell,2024-05-09 The
fashion industry continues to contribute significantly to greenhouse gas emissions It is one of the biggest polluters one of the
most wasteful of all global industries and is under increasing pressure to address unsustainable practice Emerging out of the
pandemic era the fashion industry is also responding to a variety of complex industry challenges such as high return rates
customer demand for better fitting apparel faster fashion the drive towards personalisation and greater transparency and
sustainability across the value chain These factors along with increasing labour costs are furthermore exerting force on the
industry to embrace nearshoring and reshoring Based on extensive primary research involving oral histories methodology
with leading industry professionals involved in the innovation of technological and digital solutions for the fashion industry
this book presents the latest advances in sewn product technology which offer solutions to many of the fashion industry s

current and emerging challenges whilst also informing how these developments are influencing fashion jobs of today and tomorrow This book is therefore of value to fashion students academics researchers and technicians as well as those working within the fashion industry involved in the design development manufacture buying and retail of fashion apparel Features Provides a comprehensive insight into the latest advances in sewing machine technology including advanced automation and robotics used in the manufacture of fashion apparel Provides a comprehensive insight into the latest industrial sewing threads and needles that can effectively support sustainable design practice Exclusively covers advances in digital technologies to support sustainable practice including advances in 3D body scanning and digital measuring systems recent advances in digital pattern making and pattern design systems recent advances in 3D fashion design software and the latest advances in Product Lifecycle Management PLM systems used within the fashion industry Includes sections on advances in No Sew Seam Bonding and ultrasonic welding technologies Provides an insight into advancements in 3D cloth simulation and prototyping for apparel design and gaming Enables readers to understand the impact of the latest advances in sewn product technology on the jobs of today and tomorrow Case studies that provide working examples of advances in sewn product technology
