Pasztor,2017-01-26 In the past fifty years the study of indigenous and pre Columbian art has evolved from a groundbreaking area of inquiry in the mid 1960s to an established field of research This period also spans the career of art historian Esther Pasztor Few scholars have made such a broad and lasting impact as Pasztor both in terms of our understanding of specific facets of ancient American art as well as in our appreciation of the evolving analytical tendencies related to the broader field of study as it developed and matured The essays collected in this volume reflect scholarly rigor and new perspectives on ancient American art and are contributed by many of Pasztor's former students and colleagues A testament to the sheer breadth of Pasztor's accomplishments *Visual Culture of the Ancient Americas* covers a wide range of topics from Aztec picture writing to nineteenth century European scientific illustration of Andean sites in Peru The essays written by both established and rising scholars from across the field focus on three areas the ancient Andes including its representation by European explorers and scholars of the nineteenth century Classic period Mesoamerica and its uses within the cultural heritage debate of the twentieth and twenty first centuries and Postclassic Mesoamerica particularly the deeper and heretofore often hidden meanings of its cultural production Figures maps and color plates demonstrate the vibrancy and continued allure of indigenous artworks from the ancient Americas Pre Columbian art can give more Pasztor declares and the scholars featured here make a compelling case for its incorporation into art theory as a whole The result is a collection of essays that celebrates Pasztor's central role in the development of the field of Ancient American visual studies even as it looks toward the future of the discipline Practical Astronomy with your Calculator or Spreadsheet Peter

claiming that they have neglected scientific analysis in their haste to diagnose the ills of the system In an engaging and erudite manner she reaffirms the global successes of market tested betterment and calls for empirical investigation that advances from material incentives to an awareness of the human within historical and ethical frameworks Bettering Humanomics offers a critique of contemporary economics and a proposal for an economics as a better human science
