

KC-30 Turbo-TOC® Turbine Oil Conditioning System

The Turbo-TOC® KC-30 is a 114 LPM turbine oil conditioning system that supports long-term turbine operation and significantly reduces the probability of oil related turbine failures or unscheduled maintenance due to contaminated turbine oil. It is designed for turbine oil reservoirs sizes up to 15,000 liters.

A major factor in power plant turbine oil reliability is the control and removal of undesired particulate and water. When contamination invades turbine oil, protection of the turbine bearing and journal surfaces are placed at risk and turbine performance is jeopardized. Studies have shown water contamination of 250 ppm can reduce bearing life by 50%.

Kaydon Filtration Turbo-TOC® turbine oil conditioning systems to remove harmful particulate and water from turbine lube oil used at steam, combustion, and hydroelectric power plants. The Kaydon Filtration Turbo-TOC® turbine oil conditioning system provides continuous and persistent fluid conditioning service during equipment uptime, and adds additional benefit during shutdown by quickly preparing the turbine oil for equipment start-up.
